

# Sound Blaster®

## X-Fi Xtreme Audio

### The ideal audio upgrade for Media Center PCs.

Creative's Sound Blaster X-Fi Xtreme Audio gives an experience beyond studio quality with MP3 music and movies! Featuring award-winning X-Fi technologies, X-Fi Crystalizer restores the details and vibrance lost during MP3 and DIVX compression, breathing life back into any audio, while X-Fi CMSS-3D expands stereo music and movies into amazing surround sound. Effective over virtually any speakers, including stereo speakers, Sound Blaster X-Fi Xtreme Audio even provides unbelievable surround sound over normal headphones! The low profile design plus digital out for connecting to a home cinema system make it ideal for Media Center PCs.

- **X-Fi Crystalizer restores the details and vibrance lost during audio compression, enhancing MP3/WMA, streaming audio and video, TV and radio, DivX and DVD movies.**
- **X-Fi CMSS-3D Surround up-mixes audio and video to 5.1 or 7.1 surround.**
- **X-Fi CMSS-3D Headphone delivers incredible surround sound for movies and music over stereo headphones.**
- **Includes Cyberlink PowerDVD software with DTS® and Dolby Digital®-EX decoding (via free download) for an unbeatable DVD movie watching experience. (Internet connection required.)**
- **Easy to use Entertainment Console gives easy setup and control.**
- **Low-profile PCI format with Intel HD compatible front panel connector and digital out is ideal for both standard and small form factor PCs.**
