

HyperX Beast

## Viciously aggressive design.

Kingston® HyperX® Beast memory features a dynamic and vicious new heatspreader that maximises thermal dissipation for increased reliability — and a cool, aggressive look that enhances any enthusiasts' system.

This high-performance memory offers the largest corresponding capacities available today, from 8GB–64GB, and speeds of up to 2400MHz for ultra-responsive multitasking and an overall faster system.

This vicious Beast is designed to work with third-generation Intel Core i5 and i7 processors and the latest AMD performance and gaming processors. It's available in dual and quad-channel kits and is XMP certified; higher-performing frequencies, timings and voltages are easily attainable by selecting a speed profile, hand-tuned by Kingston engineers, in BIOS, with no need for manual adjustments.

HyperX Beast is made from only the best performance-yielding components capable of achieving the highest speeds. It's backed by a lifetime warranty, 100 per cent testing and the legendary reliability that makes Kingston the world's independent memory leader, with 25 years of expertise.

### Ideal for:

- Maximising computing performance
- Reduced workload times
- Extreme enthusiasts and content creators

Features/specs on reverse >>

- > Excellent thermal dissipation
- > Speeds of up to 2400MHz and capacities of up to 64GB
- > Intel XMP Certified

## HyperX Beast

### FEATURES/BENEFITS

- > **Unique** — black heatspreader
- > **Reliable** — 100 per cent factory tested
- > **XMP profiles** — factory configured for maximum performance
- > **Guaranteed** — lifetime warranty, free technical support

### SPECIFICATIONS

- > **Capacities** 8GB, 16GB, 32GB and 64GB in kits of 2, 4 and 8
- > **Frequency speed** 1600MHz–2400MHz
- > **Operating temperature** 0°C to 85°C
- > **Storage temperature** -55°C to 100°C
- > **Dimensions** 132mm x 41.4mm
- > **DDR3 only**
- > **Available in a variety of CAS latencies**
- > **Voltage** 1.5V–1.65V
