

# SMS AERO LIGHT

Handy and stable ceiling bracket  
for smaller projectors

SMS Aero Light is our handy new ceiling bracket for projectors that weigh up to 12 kg. We have extended the product portfolio with a solid column. For installations where the length of the bracket does not need to be adjusted after mounting, it offers a very stable and affordable solution. The ceiling column can easily be cut on-site to the length of your choice. Connection cables are easily concealed thanks to the use of hidden cable channels.

- 
- For projectors up to 12 kg
  - Adjustable length
  - Stable
  - Hidden cable channel

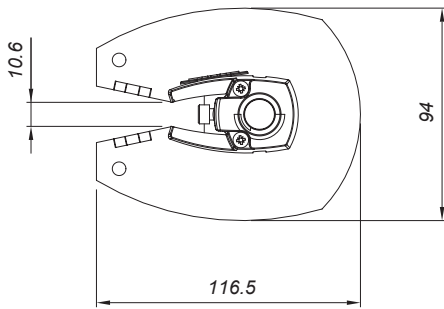

# SMS AERO LIGHT

SMS Aero Light is based on a stable yet elegant column bracket, which can be cut on site by the installer to the required length. The bracket is easy to mount and can be combined with SMS Unislide. The new ceiling plate allows cable lead-through, and a practical cable holder is included.
