

Alpha

Mousetrapper Alpha is the world's first centred ergonomic pointing device with a full-sized, integrated keyboard. Alpha has a total of 19 programmable keys, making it our most dynamic Mousetrapper to date.

Benefits of Alpha

Mousetrapper Alpha is our most comprehensive product, which combines the benefits of a centred pointing device with the user-friendliness of a full-sized keyboard. Alpha connects to your computer via Bluetooth or USB cable and has a long battery life, so you can enjoy the flexibility of working wirelessly. By combining a keyboard and an ergonomic pointing device, you will never need to think about which keyboard is suitable for your Mousetrapper or adjust the gap between the pointing device and keyboard. Mousetrapper Alpha is the perfect product for those who want to reduce pain and improve wellbeing without having to compromise efficiency or flexibility.

Key Functions

- Ergonomic mouse alternative with integrated keyboard
- 19 programmable keys for customisation to your own needs
- Up to 2 months of battery life between charges
- Control pad with click and scroll functions
- Super-slim, ergonomic design
- Bluetooth 4.1
- **2000 dpi**

Alpha

Placing your Mousetrapper centrally in front of you encourages good ergonomic posture that keeps your arms close to your body and your hands near the keyboard. This position helps you avoid and, in many cases, relieve strain injuries that can arise from stretching your arm beyond your natural shoulder width, as you do with a conventional mouse. With a Mousetrapper, you no longer have to reach beyond the keyboard while using the mouse. The wide wrist support also relieves strain on your neck, shoulders, arms and wrists.

Mousetrapper's unique control pad

By placing your index, middle and ring fingers on the control pad, you can control the cursor with simple movements as the pad moves smoothly in two dimensions. You can also click anywhere on the control pad. Switch between using different fingers and between your right and left hand to minimise static loading.

Tips for better posture and ergonomics:

- Adjust your chair so that your feet rest flat on the floor and keep your back straight while sitting.
- Keep your arms close to your body while working.
- Rest your arms on a forearm support or your desk.
- Vary your working position; use a sit-stand desk to alternate between sitting and standing.
- Place your screen at a distance that feels comfortable for both your eyes and neck.
- Avoid repetitive strain injuries (RSI) by reviewing your choice of mouse.
