

DK-400

Quick Start Guide

A. Product diagram

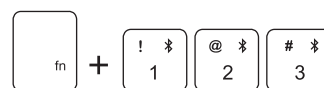

B. Bluetooth usage

Step 1: Turn on the keyboard by using the power switch on the upper right side.

Step 2: Long press any set of FN + 1 (or 2 or 3) to start the pairing process, the indicator light will start flashing.

Step 3: Search for the name “Bluetooth 3.0 keyboard” in the Bluetooth device list and click pair. Upon pairing, the indicator light on your keyboard stops blinking and remains steady.

★ Note: The Keyboard can be connected to three devices, by pressing FN + 1/2/3 you switch between connected devices.

Note: Long press FN + 1/2/3 to start the bluetooth pairing process

★ Note: To reset the keyboard Long press FN + ESC to recover factory settings of the keyboard. (this operation will clear previously connected devices)

C. Indicator light introductions:

1. The white light flickers once — Keyboard-Power-on indication
2. The white light flickers continuously — Pairing mode
3. The light is red — Keyboard is charging
4. The yellow light flickers — Low keyboard power

D. FN+ Multimedia combination key and other function keys introductions :
