

Sesh Evo

True Wireless Earbuds

# TRULY WIRELESS. LONGER LISTENING.™

Sesh™ Evo makes it easier than ever to go truly wireless. With an impressive set of features that makes the price look even smaller, there's no reason to hold out.

## KEY SELLING POINTS

### TRUE WIRELESS MEANS NO WIRES. AND NO WIRES MEANS NEW FREEDOM.

Once you go truly wireless, it's easy to forget life before it. And the only thing you have to remember now is charging. Fortunately, Sesh Evo has a super long battery life. The earbuds themselves hold up to 5 hours of playtime and you can get nearly 4 full charges (24 hours total) just by putting them back in the case. Plus, with Rapid Charge, the first 10 minutes of charging gives you up to 2 hours of playtime.

### COMPLETE CONTROLS.

With a full set of media controls, you can adjust volume, skip tracks, take calls, activate an assistant, and select different EQ modes without ever touching your phone. Plus, you can use either bud by itself.

### BE FREE, NOT FEARFUL.

Designed for durability, Sesh Evo boasts an IP55 rating for sweat, water, and dust resistance. For more peace of mind, a built-in Tile® tracker helps you find your buds if you ever misplace them. And with the Skullcandy Fearless Use Promise, if anything ever happens to a bud or the case, we'll replace the part at a discount.

### SIMPLE AND SEAMLESS TO USE.

Sesh Evo is intuitively easy, and connecting to devices is simple right out of the box. The earbuds automatically enter pairing mode the first time they power on. And after that, they'll automatically pair with the last device you used.
