The future of  
your front door

# Smart Door Lock

Lock and unlock without keys

What if your front door could unlock and lock without a key, from your mobile phone. Or if someone needed in when you're out, you could give them access with a digital key. Say hello to the Glue smart door lock.

You have the choice to purchase the Glue Smart Door Lock with or without a Glue WiFi hub. The hub enables remote lock and unlocking Lock via WiFi connection, Door Alert and Lock Status.

Without the hub, you are still able to unlock your door with your phone from a distance of up to 15 meters and use InHome deliveries.

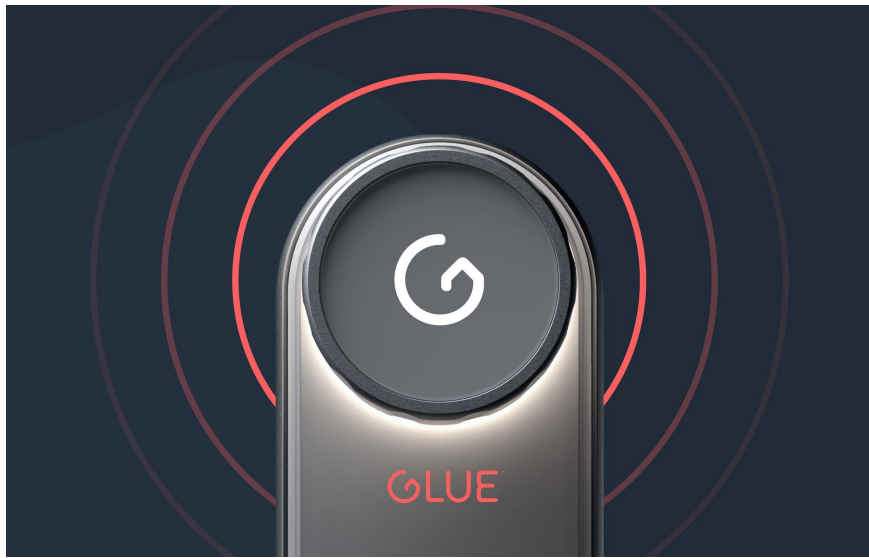

## Digital lock for your front door

Glue Smart Lock is the revolutionary Swedish digital door lock that sits on the inside of your door, completely invisible from the outside. The lock offers a convenient and smart solution for a simpler everyday life.

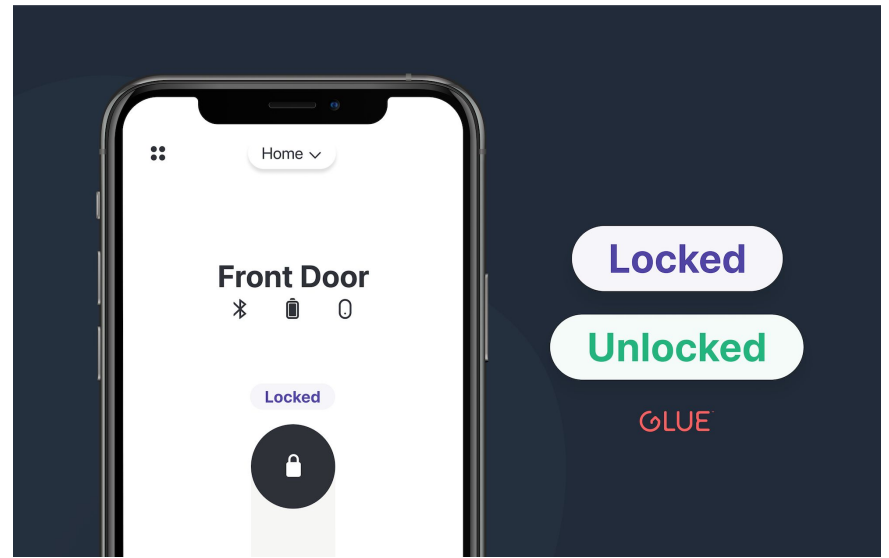

## Safe and secure

By tracking the activity on your door, you add an extra layer of security. See who is coming and going, when the last unlocking took place and feel secure knowing that Glue Smart Lock has been tested to endure technical breaches with banking-level encryption.

New Feature: Door Alert.  
The lock sends an alert to your phone if you forgot to lock

New Feature: Lockstatus  
See directly from your smartphone if the door is locked.

### Event tracking

Each key can be given to a family member, guest or friend, with real-time notifications.

### Manual unlocking

Manual unlocking is logged and recorded if a manual activity has taken place.

### Press & Go

Press twice on the thumbturn and Glue automatically locks itself behind you.

## ACTIVITY LOG

-  13:58  **Markus** gave **Emma** a key to **Front door**
- 14:10  **Emma** unlocked the **Front door**
- 14:37  **Front Door** Locked with **Press & Go** 

# Glue mounts over your existing lock. Easy to install and compatible with most lock types

Mounted on your existing door lock.

No changes or damage to your door lock

Internal fitting, invisible from the outside

Your physical keys still work as normal

Tested to the highest home security standards

**1.** Remove your existing lock cover

**2.** Attach Glue mounting plate

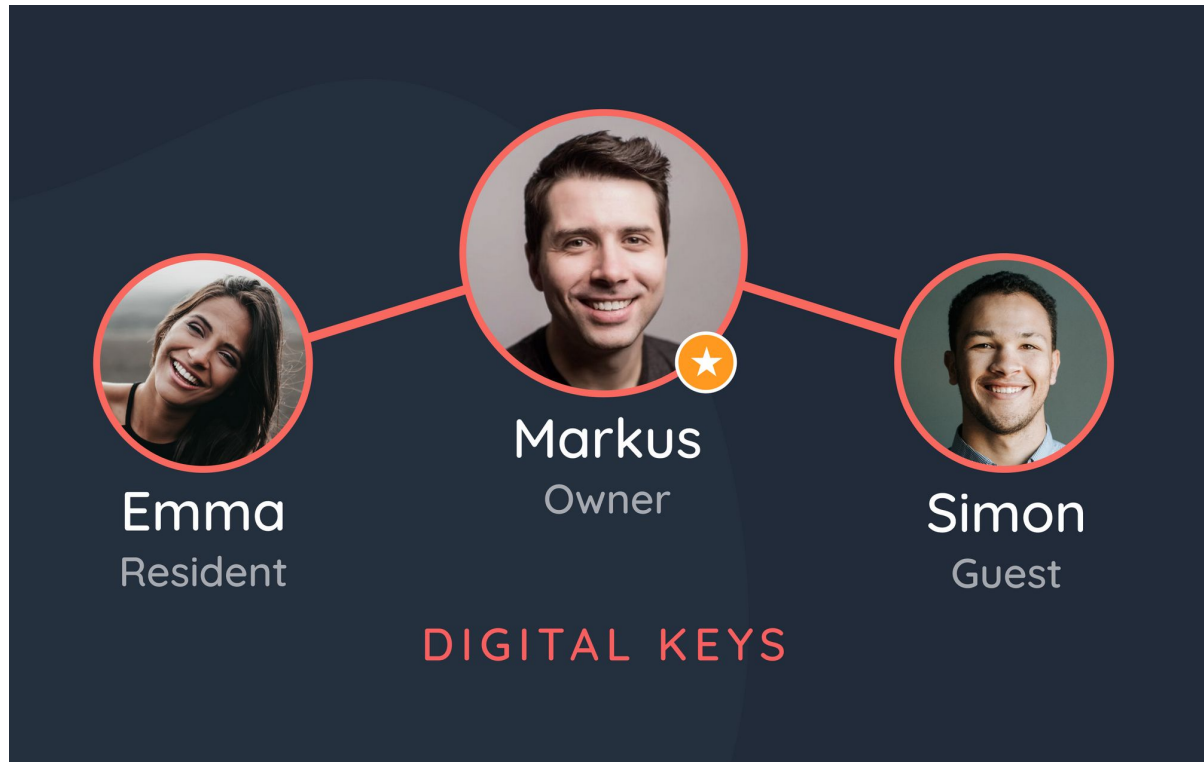

**3.** Mount lock using adapter

**4.** Screw lock to mounting plate

# Digital Keys

A digital key is an encrypted completely secure key to your home. You have full control of who has access and can grant different levels of access to the key.
