Manual Revision: 11/25/2011

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. Regardless of any direct acknowledgement elsewhere in the body of this document, StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.

Introduction

Thank you for purchasing a StarTech.com ST4200USBM High-Speed 4-Port USB2.0 hub. This ruggedly built hub is ideal for industrial environments and can be wall-mounted or installed onto a DIN rail for convenient access to the ports. This four port industrial hub can be bus-powered or self powered, with a three wire terminal block connector (7-24V).
Features

- Choice of Bus Power and/or External Terminal Block Power
- Compact space saving and mountable design (mount on a wall or DIN rail)
- Max data transfer rate of up to 480 Mbps and backwards compatible with USB 1.1
- Includes a 2 meter USB cable for quick and easy installations

Package Contents

- USB 2.0 Hub
- User's Manual
- 2m USB A-B cable
- DIN Rail Mounting Kit

Self Power Input Connectors

Downstream Port Connectors

Activity LEDs for Downstream Ports: These 4 LED indicators will blink whenever the USB ports are transferring data.

Upstream Port Connector: Type-B USB connector for upstream USB connection.

Self-Power Input Connectors: 3-Pin terminal block connectors used to connect the hub to an available power source. The voltage can be in the range of +7V to 24VDC.

WARNING: Ensure that the polarity of the input power is correctly matched to that of the terminal block pins. Otherwise, it may damage the hub.

Hardware Installation

1. Use static electricity discharge precautions

Eliminate the potential for static discharge from any objects that the hub may come in contact with before the installation. This can be accomplished by touching a bare metal chassis rail after you have turned off the power.

2. Apply DC power to the 3-pin Terminal Block Connector

The terminal block connector adds power to ensure there is enough to run the 4 downstream USB ports.

3. Connect the USB host cable

The host cable is a standard A-to-B USB2.0 cable. Connect the type-A connector to the upstream USB port being used, then connect the type-B connector to the USB hub. Since the hub is plug and play, it can be connected while the host computer is powered on.

4. Connect the USB devices to the downstream ports of the hub.

5. Mount the hub on the wall or DIN RAIL if required.

Checking the Hub Installation

To check the USB hub installation in Windows Device Manager, follow these steps:

1. Click Start
2. Click Control Panel
3. Click System
4. Click Device Manager
5. Double click Universal Serial Bus Controller
6. Double click Generic USB HUB
7. The message should show that the device is working properly

```
    Generic USB Hub
    Intel(r) 82801DB/DBM USB 2.0 Enhanced Host Controller - 24CD
    Intel(r) 82801DB/DBM USB Universal Host Controller - 24C2
    Intel(r) 82801DB/DBM USB Universal Host Controller - 24C4

Warranty Information

This product is backed by a two year warranty.

In addition, StarTech.com warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replacement with equivalent products at our discretion. The warranty covers parts and labor costs only. StarTech.com does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability

In no event shall the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the use of the product exceed the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.
