# Flexfold

## Midi Keyboard - "NORDIC LAYOUT"

### Clean and Flexible

Flexfold is the "ultimate" keyboard, appropriate for most work environments. Equally useful in the home, as in dirty industrial environments. Simple to keep clean and clear of dust, dirt, coffee etc.

Flexfold is the first choice for hospitals and laboratories, and of course tougher environments within the manufacturing industry. Flexfold is made of premium silicone, which allows it to roll-up easily, for the computer bag. The keyboard also has soft, pleasant touch keys, and quick click reply.

Lays firmly on desk, with an extremely flat design, which makes a comfortable and ergonomic working position possible. Wrists rest comfortably on desktop, relaxed.

Water resistant keyboard... use a mouse with the same characteristics. Ahaa ResiMouse part no 440-4M5W.
