

ShuttleXpress

Your **worktool** for audio, photo and video applications  
- the compact version of the multi-media controller, ShuttlePRO v2.

### ShuttleXpress is ideal for tight workspace or travel.

Portable, lightweight and cost effective, ShuttleXpress allows precision editing for your digital timeline based projects, or improved workflow in popular office based applications, whilst on the move.

With five programmable buttons, a jog dial and shuttle wheel, ShuttleXpress can be used for a number of applications ranging from photo editing and medical imaging to word processing and data entry.

### ShuttleXpress is a compact multi-media controller, based on the award-winning ShuttlePROv2

Gives you programmability and control over most of today's popular multi-media and office based programs. Designed for the traveller or light user, well established design ergonomics make sure that ShuttleXpress fits comfortably under one hand. Connecting to your computer via USB, ShuttleXpress will allow you greater control over a whole range of Mac & PC based applications.

#### Compatible Software

Adobe Creative Suite, Apple Final Cut Pro, Apple Logic Pro, Autodesk Autocad, Avid Media Composer, Avid Pro Tools, Boris FX, Sony Vegas Pro, Steinberg Cubase, Web Browsers, Apple iWork and more...

## Jog shuttle control

For creative digital timeline based apps, the fully responsive rotating dial and outer jog shuttle control give you analogue style feedback, making it perfect for reviewing video clips and editing audio tracks. Simply use the inner dial to scan your media frame by frame, or use the outer ring to allow multi-speed scanning backwards and forwards on your timeline.

## Programmable buttons

In addition, 5 fully programmable buttons can be assigned custom tasks in just about any multimedia or office application, or even assigned a series of automated tasks with the click of a button.

## AppDetection

Simply open the app that you want to use, and ShuttleXpress will adapt automatically to give you the functionality that you need, especially helpful if you regularly switch between different programs.

## Preconfigured settings

For added ease, the downloadable software drivers for Mac & PC also come pre-assigned for over 100 popular applications including such great names as Adobe CC, Apple Final Cut Pro, Autodesk Autocad, Microsoft Office and Apple iWork apps.

## Operating Systems & Useful Links

The ShuttleXpress is compatible with Apple computers running OS 8.6 and higher and PCs running Windows 98 and higher.
