Features

Performance that raises the bar for productivity

The ThinkSmart Core computing device is powered by 11th Gen Intel® Core™ vPro® processors with Intel® Iris® X^e graphics for optimized business productivity and collaboration. It comes certified for and preloaded with Microsoft Teams Rooms—perfect for employees to connect, share, and collaborate seamlessly and securely. Plus, it runs on trusted Windows 10 IoT Enterprise SAC OS.

Intuitive controls for initiating meetings, sharing content, & more

The ThinkSmart Controller boasts a 10.1" HD anti-glare, anti-smudge display with a 10-point touchscreen. With the easy-to-use Microsoft Teams interface, it's simple to initiate and control meetings, share content, and collaborate—no matter where remote colleagues are located. Engineered for convenience, the design features two viewing angles, integrated IR sensors that detect presence in the room, and USB-C connectivity. And with integrated cable management and VESA mounts, it looks great anywhere.

Smarter interactions bring the whole team together

ThinkSmart Cam, our first AI-based camera, follows conversation and facilitates interactivity for more productive meetings. Compact and lightweight, this device easily fits on a tabletop or mounts to a wall. It's certified for Microsoft Teams and delivers high contrast, vivid colors, and brighter images in low-light environments. What's more, the wide field-of-view, high resolution, and high frame rates eliminate lag and distortion. You'll feel like you're in the same room.

Ensures everyone is heard

With stereo speakers, four built-in microphones with 180-degree wide-angle coverage, and integrated noise cancellation, the ThinkSmart Bar XL delivers exceptional sound quality with lifelike clarity. Like the cam, the soundbar can be positioned easily on a tabletop or mounted to a wall or TV. Additionally, for large rooms, two mic pods are available.

Manage, monitor, deploy, & troubleshoot

With ThinkSmart Manager software, IT teams can easily deploy, monitor, manage, and troubleshoot all of your organization's ThinkSmart devices remotely. This custom-built manageability console is subscription-based and, as part of the kit, includes one year of Premium level. After a year, you have the option of subscribing to either Basic or Premium to continue the management service.

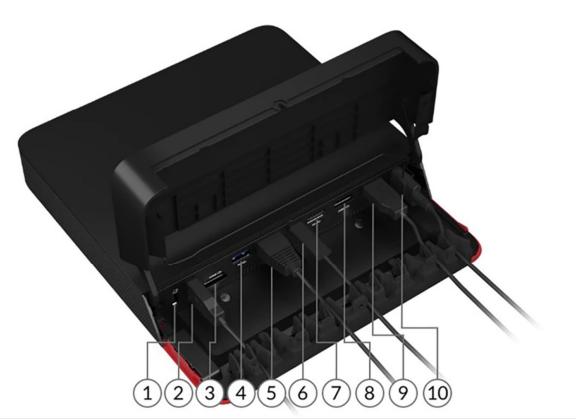

Safeguard your data

ThinkSmart Core includes ThinkShield, our built-in suite of security solutions to protect your device and your data. Additionally, the Intel vPro® platform provides the world's most comprehensive hardware-based security for business. Plus, both the Core and the Controller include a Kensington MiniSaver lock slot to physically secure the device.
