# neat.

One touch.
Two roles.

Neat Pad is a simple and elegant touch screen which you can use to control your meetings or display room availability outside the room. With its sleek design, including ideal screen angle for smooth interaction and viewing, Neat Pad beautifully blends in anywhere, whether placed on a table, wall or mullion. Thanks to just one Power over Ethernet cable, Neat Pad never runs out of battery either. It's always on, ready for you to leap into action.

Room
availability.

You can install Neat Pad outside your meeting room for optimal room management. Configure Neat Pad as a scheduling display for your Zoom Rooms or a panel for your Microsoft Teams rooms, or even deploy Neat Pad to make your non-video enabled meeting spaces bookable, provided you have the appropriate platform license. You can instantly book the room without having to go through your other calendar systems, and integrated LED indicators show room availability at a glance, even from down a corridor.

Meeting control.

As a controller, Neat Pad enables you to quickly start your meetings and share your screen with just one tap. Configure Neat Pad as a controller for your Zoom Rooms or console for your Teams rooms. It also allows you to invite participants, mute them if necessary or record your meetings. And when connected to a third-party Zoom Rooms system, it not only replaces a conventional tablet controller but offers superior features.

Simple set-up.

Neat Pad ships with a wall and side mount, so it's easy for anyone to install and set up. Use the wall mount to fix Neat Pad to your meeting room wall. With the side mount, you can secure Neat Pad to the edge of your doorframe or mullion. Thanks to just one Power over Ethernet cable, Neat Pad is always alert and set to go.

Just works.

When configured as a controller, Neat Pad ensures any meeting room is always ready. You can add multiple Neat Pads so that everyone has access to its controls from anywhere around the table. And in an upcoming software release, Neat Pad's two built-in microphones will allow for enhanced audio pickup on all Neat systems.

Dual device.

Neat Pad has an optimal screen angle for easy viewing and interaction. Whether it's placed on a table or wall to control your meetings or display room availability outside the room, its slimline design enables it to fit anywhere.

No need to run cables across the room.

Just one cable for power and ethernet or connect via Wifi. Plugs into any outlet.

One-click wireless sharing that works every time.

The integrated ultrasonic speakers frill all corners of the room to ensure reliable device pairing from third-party Zoom Rooms systems.

Enhanced audio pickup for larger rooms and when facing away from the screen.

In an upcoming so tware release, Neat Pad's two built-in microphones will allow for enhanced audio pickup on all Neat systems.

See room availability at a glance. Even from down a hallway.

Integrated multi color side LED indicators.

Neat Pad is our dedicated touch control for meetings that doubles as a room availability display.
