

# Lenovo ThinkSystem SR250 Server (E-2200) Product Guide

Lenovo ThinkSystem SR250 is an affordable, single-socket 1U rack server for small and medium businesses that need optimized performance and flexibility for future growth, along with enterprise-class reliability, management, and security.

The SR250 server offers a wide range of processors — from Intel Celeron to Intel Xeon E Series. With support for a memory capacity of up to 128 GB and internal storage of up to 32 TB, the SR250 server is an ideal choice for small- to medium-sized business, workgroups, distributed locations, and web-scale workloads.

Flexible and scalable internal storage configurations include up to ten 2.5-inch or four 3.5-inch drives with affordable software RAID or advanced hardware RAID protection and a wide selection of drive sizes and types, including NVMe PCIe SSDs, SAS/SATA SSDs, and SAS/SATA HDDs. Also, it features integrated dual-port 1 Gb Ethernet NIC and additional PCIe expansion slots for hardware RAID protection, network scalability, and external storage connectivity.

The next-generation Lenovo XClarity Controller, which is built into the SR250 server, provides advanced service processor control, monitoring, and alerting functions.

The following figure shows the Lenovo ThinkSystem SR250.

Figure 1 Lenovo ThinkSystem SR250

## Did you know?

The SR250 server offers enterprise-class reliability features such as error correcting code (ECC), hot-swap components, and advanced RAID protection with flexible storage options at an affordable price.

The SR250 server has a mere 19.6-inch (498 mm) deep chassis, helping customers reduce their business footprint.

The SR250 server offers performance, energy efficiency, and serviceability features, such as NVMe PCIe SSDs, 80 PLUS Gold and Platinum certified power supplies, and easy access to upgrades and serviceable parts (such as memory DIMMs and adapter cards), which is not typically found in the single-socket value servers.

The SR250 server offers easy-to-use, enterprise-class manageability to monitor server availability and perform remote management with the built-in Lenovo XClarity Controller.

#### **Key features**

The SR250 server is a compact, cost-effective, single-processor 1U rack server that has been optimized to provide enterprise-class features to small-to-medium-sized businesses, retail stores, or distributed enterprises.

#### Scalability and performance

The SR250 server offers numerous features to boost performance, improve scalability, and reduce costs:

- Improves productivity by offering superior system performance with the Intel Xeon E Series processors with up to 6 cores, up to 16 MB of last level cache (LLC), up to 2666 MHz memory speeds, and up to 8 GT/s bus speed.
  - Choice of processors with up to 6 cores and up to 16 threads to enable the effective use of multithreaded applications.
  - Intelligent and adaptive system performance with energy efficient Intel Turbo Boost 2.0
    Technology allows CPU cores to run at maximum speeds during peak workloads by temporarily
    going beyond processor thermal design power (TDP).
  - Intel Hyper-Threading Technology boosts performance for multithreaded applications by enabling simultaneous multithreading within each processor core, up to two threads per core.
  - Intel Virtualization Technology integrates hardware-level virtualization hooks that allow operating system vendors to better utilize the hardware for virtualization workloads.
  - Intel Advanced Vector Extensions (AVX) enable acceleration of enterprise-class and high performance computing (HPC) workloads.
- Provides memory speed, availability, and capacity of up to 128 GB memory with up to four 2666 MHz DDR4 ECC UDIMMs.
- Offers flexible and scalable internal storage in a 1U rack form factor with up to 10x 2.5-inch drives for performance-optimized configurations or up to 4x 3.5-inch drives for capacity-optimized configurations, providing a wide selection of SAS/SATA HDD/SSD and PCIe NVMe SSD types and capacities.
- Provides I/O scalability with the onboard LOM interface and up to three PCI Express (PCIe) 3.0 I/O expansion slots in a 1U rack form factor.
- Reduces I/O latency and increases overall system performance with Intel Integrated I/O Technology that embeds the PCI Express 3.0 controller with 16 lanes into the processors.

#### Availability and serviceability

The SR250 server provides many features to simplify serviceability and increase system uptime:

- Offers ECC protection which provides error correction not available in PC-class "servers" that use parity memory.
- Provides easy access to upgrades and serviceable parts (such as memory DIMMs and adapter cards) with tool-less cover removal.
- Offers data protection and greater system uptime with a choice of affordable onboard SATA RAID or advanced hardware RAID redundancy, along with hot-swap drives (select models).
- Provides availability for business-critical applications with redundant hot-swap power supplies (select models).
- Allows preventive actions in advance of possible failure, thereby increasing server uptime and application availability with Proactive Platform Alerts (including PFA and SMART alerts) for memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 SSDs), RAID controllers, and server ambient and sub-component temperatures.
- Continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failure to minimize downtime with Built-in XClarity Controller (XCC).
- Provides quick access to system status, firmware, network, health, and alerts information via Virtual Operator Panel from the XClarity Mobile App running on the Android or iOS mobile device that is connected to the front USB port with XClarity Controller access.

 Speeds up troubleshooting tasks to reduce service time with diagnostics built into the XClarity Provisioning Manager.

#### Manageability and security

Powerful systems management features simplify local and remote management of the SR250 server and deliver enterprise-class data protection:

- Provides advanced service processor control, monitoring, and alerting functions with XClarity Controller, a next generation service processor.
- Improves Unified Extensible Firmware Interface (UEFI) system setup, configuration, updates, simplified error handling, and operating system deployment with the embedded XClarity Provisioning Manager.
- Offers XClarity Essentials software tools that can help customers set up, use, and maintain the server.
- Increases uptime, reduces costs, and improves productivity through advanced server management capabilities with Lenovo XClarity Administrator that provides comprehensive hardware management.
- Provides on-the-go monitoring and management of devices in XClarity Administrator from anywhere with the Lenovo XClarity mobile app, which can help improve efficiency and reduce downtime risks.
- Centralizes infrastructure resource management with Lenovo XClarity Integrators for VMware vCenter and Microsoft System Center, extending XClarity Administrator features to virtualization management software tools and enabling users to deploy and manage infrastructure end-to-end.
- Offers advanced cryptographic functionality (such as digital signatures and remote attestation) with an integrated Trusted Platform Module (TPM) or optional Nationz TPM (available only in PRC).
- Keeps user data safe with Lenovo Business Vantage, a security software tool suite designed to work with the Nationz Trusted Platform Module (available only in PRC).
- Establishes a solid security foundation for workloads by delivering firmware that is securely built, tested, digitally signed, and verified prior to execution.
- Offers enterprise-class data protection with advanced RAID and optional self-encrypting drives.
- Provides faster, stronger encryption with industry-standard AES NI support.
- Helps prevent certain classes of malicious buffer overflow attacks with Intel Execute Disable Bit functionality, when combined with a supporting operating system.
- Enhances security through hardware-based resistance to malicious software attacks with Intel Trusted Execution Technology (Xeon E Series processors only), allowing an application to run in its own isolated space, protected from all other software running on a system.
- Helps prevent unauthorized software from running on the server by protecting against boot block-level malicious software with Intel Boot Guard technology.
- Protects application code and data from disclosure or modification with Intel Software Guard Extensions (SGX), enabling high-assurance security use cases, such as blockchain, identity and records privacy, secure browsing, and digital rights management (DRM).

#### **Energy efficiency**

The SR250 server offers the following energy-efficiency features to save energy, reduce operational costs, increase energy availability, and contribute to the green environment:

- Delivers optimized compute power per watt, featuring 80 PLUS Gold (fixed) and Platinum (hot-swap) AC power supplies.
- Reduces power drawn with Intel Intelligent Power Capability that powers individual processor elements on and off as needed.
- Helps reduce power consumption with variable speed fans.
- Helps achieve lower heat output and reduced cooling needs with Lenovo XClarity Energy Manager that provides advanced data center power notification, analysis, and policy-based management.

## **Components and connectors**

The following figure shows the front of the SR250 server with four 3.5-inch drive bays.

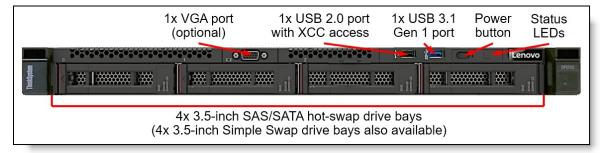

Figure 2. Front view of the SR250: 4x 3.5-inch drive bays

The following figure shows the front of the SR250 server with eight 2.5-inch drive bays.

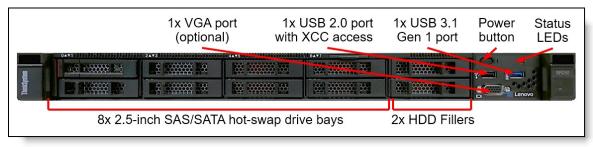

Figure 3. Front view of the SR250: 8x 2.5-inch drive bays

The following figure shows the front of the SR250 server with ten 2.5-inch drive bays.

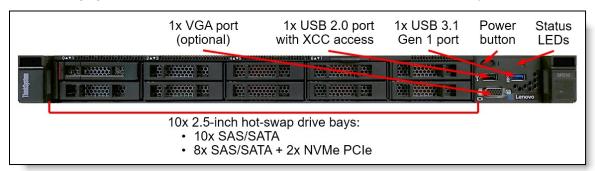

Figure 4. Front view of the SR250: 10x 2.5-inch drive bays

The front of the SR250 server includes the following components:

- · Drive bays:
  - 4x 3.5-inch (Large Form Factor [LFF]) SATA simple-swap; or
  - 4x 3.5-inch SAS/SATA hot-swap; or
  - 8x 2.5-inch (Small Form Factor [SFF]) SAS/SATA hot-swap; or
  - 10x 2.5-inch hot-swap drive bays:
    - 10x SAS/SATA
    - 8x SAS/SATA and 2x NVMe PCIe
- One VGA port (optional)
- One USB 2.0 port with XClarity Controller access
- One USB 3.1 Gen 1 port
- A Power button
- Status LEDs

The following figure shows the rear of the SR250 server.

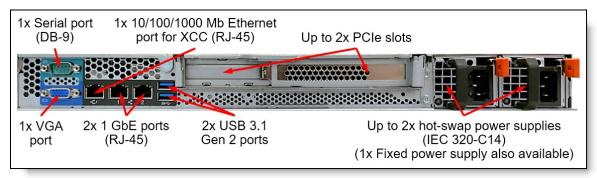

Figure 5. Rear view of the SR250

The rear of the SR250 server includes the following components:

- Up to two PCIe expansion slots (depending on the riser cards selected)
- One 1 GbE port for XClarity Controller
- One RS-232 serial port
- One VGA port
- Two 1 GbE data network ports
- Two USB 3.1 Gen 2 ports
- Power supplies
  - Up to two hot-swap power supplies; or
  - One fixed power supply

The following figure shows the locations of key components inside the SR250 server.

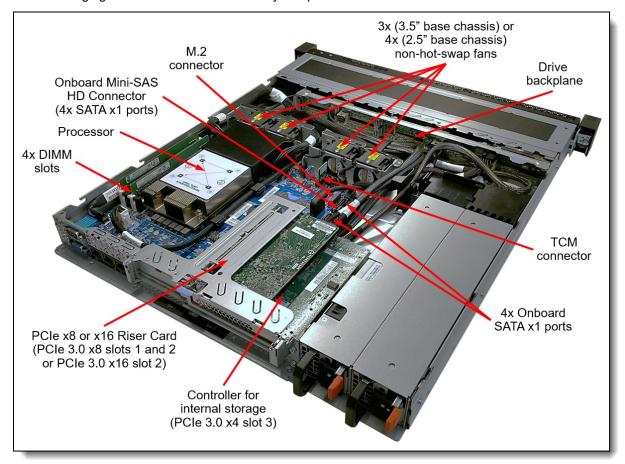

Figure 6. Internal view of the SR250

The SR250 server includes the following internal components:

- One processor
- Four DIMM slots
- Up to three PCle 3.0 slots:
  - Slot 1: PCle 3.0 x8 (not present if the Slot 2 is PCle x16)
  - Slot 2: PCle 3.0 x8 or x16
  - Slot 3: PCle 3.0 x4 (only supports a controller for internal storage)
- Eight onboard SATA ports:
  - One Mini-SAS HD connector (4x SATA x1 ports)
  - Four SATA connectors (each connector provides the SATA x1 port)
- One TCM/TPM connector (supports Nationz TPM available in PRC only)
- Drive backplanes:
  - o 4x LFF SATA simple-swap bracket; or
  - 4x LFF SAS/SATA hot-swap; or
  - 8x SFF SAS/SATA hot-swap; or
  - 8x SFF SAS/SATA and 2x SFF AnyBay hot-swap
- Four non-hot-swap system fans
- One M.2 connector

## **Standard specifications**

The following table lists the system specifications for the SR250 server.

Table 1. SR250 system specifications

| Attribute                 | Specification   |
|---------------------------|---|
| Form factor               | 1U rack-mount.  |
| Processor                 | One Intel Xeon E, Core i3, Pentium Gold, or Celeron processor.  |
| Chipset                   | Intel C246.   |
| Memory                    | 4 DIMM sockets (two memory channels with two DIMMs per channel). Support for ECC UDIMMs. Memory speed up to 2666 MHz.   |
| Memory capacity           | <ul> <li>Xeon E Series: Up to 128 GB (4x 32 GB UDIMMs).</li> <li>Core i3, Pentium Gold, Celeron G Series: Up to 64 GB (4x 16 GB UDIMMs).</li> </ul>   |
| Memory protection         | Error correction code (ECC).  |
| Drive bays                | <ul> <li>4 LFF (3.5-inch) SATA Simple Swap drive bays.</li> <li>4 LFF (3.5-inch) SAS/SATA hot-swap drive bays.</li> <li>8 SFF (2.5-inch) SAS/SATA hot-swap drive bays.</li> <li>10 SFF (2.5-inch) hot-swap drive bays: <ul> <li>10x 2.5" SAS/SATA.</li> <li>8x 2.5" SAS/SATA &amp; 2x 2.5" NVMe PCIe.</li> </ul> </li> </ul>  |
| Internal storage capacity | <ul> <li>2.5-inch drives:</li> <li>76.8TB using 10x 7.68TB 2.5-inch SAS/SATA SSDs</li> <li>3.84TB using 2x 1.92TB 2.5-inch NVMe SSDs</li> <li>24TB using 10x 2.4TB 2.5-inch HDDs</li> </ul>   |
|                           | <ul> <li>3.5-inch drives:         <ul> <li>80TB using 4x 20TB 3.5-inch HDDs</li> <li>15.36TB using 4x 3.84TB 3.5-inch SAS/SATA SSDs</li> </ul> </li> <li>Intermix of SAS and SATA is supported</li> </ul>   |
|                           | The mile mix or one and on the supported  |
| Storage controller        | <ul> <li>Onboard 6 Gbps SATA:</li> <li>AHCI non-RAID.</li> <li>RAID 0/1/10/5 with Intel RSTe.</li> </ul>  |
|                           | <ul> <li>12 Gbps SAS/6 Gbps SATA RAID:</li> <li>RAID 0/1/10/5/50 with RAID 530-8i or RAID 730-8i 1GB Cache.</li> <li>RAID 0/1/10/5/50/6/60 with RAID 730-8i 2GB Flash, RAID 930-8i 2GB Flash, or RAID 930-16i 4GB Flash.</li> </ul>   |
|                           | <ul> <li>12 Gbps SAS/6 Gbps SATA non-RAID: 430-8i or 16i HBA.</li> </ul>  |
|                           | NVMe PCle non-RAID: 1610-4P NVMe Switch Adapter.  |
| Optical drive bays        | None. Support for an external USB DVD RW Optical Disk Drive (SeeOptical drives).  |
| Network interfaces        | 2x Onboard 10/100/1000 Mb Ethernet RJ-45 ports (BCM5720 NIC).   |
| I/O expansion slots       | Up to three slots. Slot 3 is the fixed slot on the system planar, and the remaining slots depend on the riser cards installed. The slots are as follows:  • Slot 1: PCle 3.0 x8; low profile (not present if the Slot 2 is x16)  • Slot 2: PCle 3.0 x8 (x16 physical connector) or x16; full-height, half-length  • Slot 3: PCle 3.0 x4 (supports an internal storage controller) |

| Attribute             | Specification  |
|-----------------------|--|
| Ports                 | <ul> <li>Front: 1x VGA port (optional), 1x USB 3.1 Gen 1 port, and 1x USB 2.0 port with XClarity<br/>Controller access.</li> </ul>   |
|                       | <ul> <li>Rear: 1x VGA port, 2x USB 3.1 Gen 2 ports, 1x DB-9 serial port, and 1x RJ-45 10/100/1000<br/>Mb Ethernet systems management port.</li> </ul>  |
| Cooling               | Four non-hot-swap system fans.   |
| Power supply          | One fixed 300 W Gold, or up to two redundant hot-swap 450 W Platinum AC power supplies.  |
| Video                 | Matrox G200 with 16 MB memory integrated into the XClarity Controller. Maximum resolution is 1920x1200 at 60 Hz with 32 bits per pixel.  |
| Hot-swap parts        | Drives (select models) and power supplies (select models).   |
| Systems<br>management | XClarity Controller (XCC) Standard, Advanced, or Enterprise (Pilot 4 chip), proactive platform alerts, XClarity Provisioning Manager, XClarity Essentials, XClarity Administrator, XClarity Integrators for VMware vCenter and Microsoft System Center, XClarity Energy Manager, Capacity Planner.   |
| Security<br>features  | Power-on password, administrator's password, secure firmware updates, Trusted Platform Module (TPM) 1.2 or 2.0 (configurable UEFI setting). Optional lockable front bezel. Optional Nationz TPM (available only in PRC). Optional Lenovo Business Vantage security software (available only in PRC).   |
| Operating systems     | Microsoft Windows Server, Red Hat Enterprise Linux, SUSE Linux Enterprise Server, VMware ESXi. See the Operating systems section for specifics.  |
| Warranty              | One-year (7Y52) or three-year (7Y51, 7Y72, and 7Y73) customer-replaceable unit (CRU) and onsite limited warranty with 9x5 Next Business Day Parts Delivered.   |
| Service and support   | Optional service upgrades are available through Lenovo Services: 2-hour or 4-hour response time, 6-hour or 24-hour committed service repair (select areas), warranty extension up to 5 years, 1-year or 2-year post-warranty extensions, Premier Support, YourDrive YourData, Enterprise Software Support, and Basic Hardware Installation Services. |
| Dimensions            | Width: 435 mm (17.1 in.), height: 43 mm (1.7 in.), depth: 545 mm (21.5 in.). See hysical specifications for details.   |
| Weight                | Base configuration: 9.1 kg (20.1 lb), maximum: 12.3 kg (27.1 lb)   |

#### Models

ThinkSystem SR250 models can be configured by using the Lenovo Data Center Solution Configurator (DCSC).

Configure-to-order (CTO) models are used to create models with factory-integrated server customizations. For CTO models, two base CTO models are available for the SR250 as listed in the following table, CTO1WW and CTOLWW:

- The CTO1WW base CTO model is for general business and is selectable by choosing General Purpose mode in DCSC.
- The CTOLWW base model is intended for High Performance Computing (HPC) and Artificial
  Intelligence (AI) configurations and solutions, including configurations for Lenovo Scalable Infrastructure
  (LeSI), and is enabled using either the HPC & AI LeSI Solutions mode or HPC & AI Hardware mode
  in DCSC. CTOLWW configurations can also be built using System x and Cluster Solutions Configurator
  (x-config).

Preconfigured server models may also be available for the SR250, however these are region-specific; that is, each region may define their own server models, and not all server models are available in every region.

The following table lists the base CTO models of the ThinkSystem SR250 server.

Table 2. Base CTO models

| Machine Type/Model<br>General purpose | Machine Type/Model for HPC and Al | Description                         |
|---------------------------------------|-----------------------------------|-------------------------------------|
| 7Y51CTO1WW                            | 7Y51CTOLWW                        | ThinkSystem SR250 - 3 year Warranty |
| 7Y52CTO1WW                            | 7Y52CTOLWW                        | ThinkSystem SR250 - 1 year Warranty |

For customers in India, additional machine types are available as listed in the following table.

Table 3. CTO base models for India

| Description  | Machine Type/Model |
|--|--------------------|
| ThinkSystem SR250 India with RDN PSU (3-Year Warranty)   | 7Y72CTO1WW         |
| ThinkSystem SR250 India with Fixed PSU (3-Year Warranty) | 7Y73CTO1WW         |

The following table lists the base chassis for CTO models of the SR250 server.

Table 4. Base chassis for CTO models

| Feature code | Description                            |
|--------------|--|
| B403         | ThinkSystem SR250/SR150 4x3.5" Chassis |
| B404         | ThinkSystem SR250 2.5" Chassis         |

All models of the SR250 server are shipped with the *Electronic Publications Flyer*.

Models table conventions: The model tables shown in this section use the following conventions:

- Drive bays:
  - If the number is shown as "x", it represents the quantity of the SAS/SATA drive bays.
  - If the number is shown as "x+y", it represents the quantity of the SAS/SATA + NVMe drive bays.
- XClarity Controller: "S" = Standard, "A" = Advanced, "E" = Enterprise.
- Front VGA port: "Y" = Included; "N" = Not included, optional.
- Tool-less 4-Post Rail Kit: "Y" = Included; "N" = Not included, optional.

- Power cord:
  - "R1" = 1.5 m C13-C14 rack power cable.
  - "R2" = 2.8 m C13-C14 rack power cable.
  - "L2" = 2.8 m line cord.
  - "N" = Not included; see Power supplies and cables for the ordering information.

The following tables list the models of the SR250 server for the following regions:

- North America
- Brazil
- Latin America (except Brazil)
- Europe, Middle East, and Africa (EMEA)
- India
- · Hong Kong, Taiwan, Korea
- Japan
- Association of Southeast Asian Nations (ASEAN)
- Australia and New Zealand

<sup>\*</sup> Processor details: Processor quantity and model, cores, thermal design power (TDP), and core speed.

#### **Processors**

The SR250 supports one processor from the Intel product family formerly known by the codename "Coffee Lake-S Refresh". This includes processors from the Intel Xeon E, Core i3, Pentium Gold, and Celeron G families.

The server supports the processors that are listed in the following table.

**Integrated graphics and management**: Xeon processors with a G suffix include integrated graphics, however, this functionality is not used in the SR250. Instead, graphics support is provided by XClarity Controller (XCC), or by an GPU add-in card. Similarly system management of the SR250 is handled by XCC and as a result, the AMT management processor is disabled.

Table 14. Processor specifications (HT = Hyper-Threading, TB = Turbo Boost, VT = Virtualization Technology)

| CPU<br>model | Core frequency<br>(Base / TB Max) | Number of cores / threads | Cache | Max DDR4 frequency | Max<br>memory<br>capacity | Bus<br>speed | TDP  | ECC | нт  | тв  | VT-x | VT-d | SGX |

The following table lists feature codes for the processors that are available for the SR250 server.

Table 15. Processor feature codes

| Feature code      | Description                                 |
|-------------------|---|
| Intel Xeon E pro  | cessors                                     |
| BAJY              | Intel Xeon E-2224 4C 71W 3.4GHz Processor   |
| BAJX              | Intel Xeon E-2224G 4C 71W 3.5GHz Processor  |
| BAJW              | Intel Xeon E-2226G 6C 80W 3.4GHz Processor  |
| BAJV              | Intel Xeon E-2234 4C 71W 3.6GHz Processor   |
| BAJU              | Intel Xeon E-2236 6C 80W 3.4GHz Processor   |
| BAJT              | Intel Xeon E-2244G 4C 71W 3.8GHz Processor  |
| BAJS              | Intel Xeon E-2246G 6C 80W 3.6GHz Processor  |
| BAJR              | Intel Xeon E-2274G 4C 83W 4.0GHz Processor  |
| BAJQ              | Intel Xeon E-2276G 6C 80W 3.8GHz Processor  |
| BAJN              | Intel Xeon E-2278G 8C 80W 3.4GHz Processor  |
| BAJP              | Intel Xeon E-2286G 6C 95W 4.0GHz Processor  |
| Intel Core i3 pro | cessors                                     |
| BAK4              | Intel Core i3-9100 4C 65W 3.6GHz Processor  |
| Intel Pentium Go  | old processors                              |
| BAK7              | Intel Pentium G5420 2C 54W 3.8GHz Processor |

## **Memory**

The SR250 server supports up to 4 TruDDR4 memory UDIMMs with ECC protection. The processor has two memory channels with two DIMMs per channel.

Lenovo TruDDR4 memory uses the highest-quality components sourced from Tier 1 DRAM suppliers and only memory that meets strict requirements is selected. It is compatibility tested and tuned on every ThinkSystem server to maximize performance and reliability.

TruDDR4 memory has a unique signature programmed into the DIMM, which enables Lenovo servers to verify whether the memory installed is qualified and supported. Lenovo qualified and supported TruDDR4 memory is covered by Lenovo warranty, and service and support provided worldwide.

The following rules apply when selecting the memory configuration:

- The server supports memory configurations with 1, 2, 3, or 4 UDIMMs.
- Mixing UDIMMs of different capacity is *not* supported.
- All DIMMs in the server operate at the same speed up to 2666 MHz, which is determined by the
  maximum memory speed supported by the specific processor (see Processors for details).
   Note: Maximum memory speed can be achieved when Max performance mode is enabled in UEFI.
- The server supports up to 128 GB of memory.
   Note: 32 GB UDIMMs are supported only with the Intel Xeon E Series processors; Core i3, Pentium Gold, and Celeron G Series processors do not support 32 GB UDIMMs.

The following table lists memory options available for the SR250 server.

Table 16. Memory options

| Description   | Part number | Feature code | Maximum quantity |
|---|-------------|--------------|------------------|
| ThinkSystem 8GB TruDDR4 2666MHz (1Rx8, 1.2V) ECC UDIMM  | 4ZC7A08696  | B35J         | 4                |
| ThinkSystem 16GB TruDDR4 2666MHz (2Rx8, 1.2V) ECC UDIMM | 4ZC7A08699  | B35K         | 4                |
| ThinkSystem 32GB TruDDR4 2666MHz (2Rx8, 1.2V) ECC UDIMM | 4ZC7A15142  | B96E         | 4                |

## Internal storage

The SR250 server supports the following internal drive bay configurations:

- 1. 4 LFF SATA Simple Swap drive bays
- 2. 4 LFF SAS/SATA hot-swap drive bays
- 3. 8 SFF SAS/SATA hot-swap drive bays
- 4. 10 SFF hot-swap drive bays:
  - a. 10x 2.5" SAS/SATA
  - b. 8x 2.5" SAS/SATA & 2x 2.5" NVMe PCIe

In addition, the SR250 server models can be configured with one internal M.2 SATA non-hot-swap SSD.

The following figure shows the internal drive bay configurations.

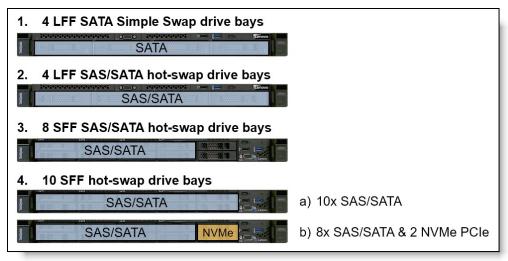

Figure 7. Internal drive bay configurations

The following table lists the internal storage options for the SR250 server.

**X30** and **X40** adapters: Some of the kits are for X30 adapters, which correspond to any of the RAID 930, 730, 530 or HBA 430 storage adapters. Some kits are for use with X40 adapters, which correspond to RAID 940 and HBA 440 storage adapters.

Table 17. Internal storage options

| Part number | Feature code | Description                               | Maximum quantity |
|-------------|--------------|---|------------------|
| Simple-swap | (SS) back    | plane kits                                |                  |
| None*       | BMNP         | ThinkSystem SR250 4x3.5" SS BP BKT Kit v2 | 1                |

|               |              |  |                  |

<sup>\*</sup> Factory-installed only, no field upgrade.

## **Configuration notes:**

- The AnyBay backplane allows either SAS/SATA drives or NVMe PCIe drives in the drive bays 8 and 9.
- Configurations with NVMe PCIe drives are supported only for Machine Types 7Y51, 7Y52, and 7Y72;
   Machine Type 7Y73 does not support configurations with NVMe PCIe drives.
- Field upgrades for models with 3.5-inch drive bays:
  - Models with 4x 3.5" SS drive bays and an onboard SATA controller can be upgraded to support a hardware RAID controller or HBA by using one of the following:
    - For use with X30 RAID/HBA adapters: 4x3.5" SS Backplane Bracket Kit for HW RAID/HBA (4M17A80597 or 4M17A14200)
    - For use with X40 RAID/HBA adapters: 4x3.5" SS Backplane Bracket Kit for HW X40 RAID/HBA (4M17A80601)
  - Models with 4x 3.5" SS drive bays can be upgraded to support 4x 3.5" HS drive bays and a hardware RAID controller or HBA by using one of the following:
    - For use with X30 RAID/HBA adapters: 3.5" HS SATA/SAS 4-Bay Backplane Cable Kit (4M17A80605 or 4M17A13565). The kit includes the hot-swap backplane (BMPX or B412) and the SAS/SATA cable for HW RAID/HBA (B415).
    - For use with X40 RAID/HBA adapters: 3.5" HS SATA/SAS 4-Bay Backplane with X40 RAID Cable Kit (4M17A80607 or 4M17A80602). The kit includes the backplane and the

cable for connecting to the X40 adapters

- Models with 4x 3.5" HS drive bays and an onboard SATA controller can be upgraded to support a hardware RAID controller or HBA by using one of the following:
  - For use with X30 RAID/HBA adapters: 3.5"/2.5" HS SAS/SATA x4 Cable for HW RAID/HBA (4Z57A12652)
  - For use with X40 RAID/HBA adapters: 3.5"/2.5" HS SAS/SATA x4 Cable for HW X40 RAID/HBA (4Z57A80610)
- Field upgrades for models with 2.5-inch drive bays:
  - Models with 8x 2.5" HS drive bays and an onboard SATA controller can be upgraded to support a hardware RAID controller or HBA by using two of the following:
    - For use with X30 RAID/HBA adapters: 3.5"/2.5" HS SAS/SATA x4 Cable for HW RAID/HBA (4Z57A12652)
    - For use with X40 RAID/HBA adapters: 3.5"/2.5" HS SAS/SATA x4 Cable for HW X40 RAID/HBA (4Z57A80610)
  - Models with 8x 2.5" HS drive bays and an onboard SATA controller can be upgraded to support 10x 2.5" HS drive bays and a hardware RAID controller or HBA by using the 2.5" HS AnyBay 10-Bay Backplane (4C57A80517 or 4C57A12112). The following additional cables are needed:
    - NVMe support: Two 3.5"/2.5" HS SAS/SATA x4 Cables for HW RAID/HBA (4Z57A12652 for X30 or 4Z57A80610 for X40) and two 10x2.5" HS NVMe Cables (4Z57A12651).
    - No NVMe support: **Three** 3.5"/2.5" HS SAS/SATA x4 Cables for HW RAID/HBA (4Z57A12652 for X30 or 4Z57A80610 for X40).
  - Models with 8x 2.5" HS drive bays and a hardware RAID controller or HBA can be upgraded to support 10x 2.5" HS drive bays by using the 2.5" HS AnyBay 10-Bay Backplane (4C57A80517 or 4C57A12112). The following additional cables are needed:
    - NVMe support: **Two** 10x2.5" HS NVMe Cables (4Z57A12651).
    - No NVMe support: One 3.5"/2.5" HS SAS/SATA x4 Cable for HW RAID/HBA (4Z57A12652 for X30 or 4Z57A80610 for X40).
  - Models with 10x 2.5" HS drive bays and an NVMe Switch Adapter can be upgraded to support a hardware RAID controller or HBA by using two of the following:
    - For use with X30 RAID/HBA adapters: 3.5"/2.5" HS SAS/SATA x4 Cable for HW RAID/HBA (4Z57A12652)
    - For use with X40 RAID/HBA adapters: 3.5"/2.5" HS SAS/SATA x4 Cable for HW X40 RAID/HBA (4Z57A80610)
- Controllers for internal storage are not included with the field upgrade options.
- The M.2 SSD cannot be used in the configurations with eight drives that are connected to the onboard SATA controller (the SATA port 7 is shared between the drive bay 7 and the M.2 connector).

The following table lists supported internal storage configurations with the SAS/SATA and AnyBay backplanes.

Table 18. Internal storage configurations

|                                  |                                | ack<br>pe | -                  |                             |                       |                              |                               | е                               | 1                             |   |

<sup>\*</sup> The number in brackets (x) specifies the quantity of drive bays connected to each of the controllers.

#### SED encryption key management with ISKLM

The server supports self-encrypting drives (SEDs) as listed in the Internal drive options section. To effectively manage a large deployment of these drives in Lenovo servers, IBM Security Key Lifecycle Manager (SKLM) offers a centralized key management solution. A Lenovo Feature on Demand (FoD) upgrade is used to enable this SKLM support in the management processor of the server.

The following table lists the part numbers and feature codes for the upgrades.

Table 19. FoD upgrades for SKLM support

| Part number       | Feature code      | Description  |  |  |
|-------------------|-------------------|--|--|--|
| Security Key Life | cycle Manager - F | oD (United States, Canada, Asia Pacific, and Japan)                    |  |  |
| 00D9998           | A5U1              | SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 1 year S&S |  |  |
| 00D9999 AS6C S    |                   | KLM for System x/ThinkSystem w/SEDs - FoD per Install with 3 year S&S  |  |  |
| Security Key Life | cycle Manager - F | oD (Latin America, Europe, Middle East, and Africa)                    |  |  |
| 00FP648           | A5U1              | SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 1 year S&S |  |  |
| 00FP649           | AS6C              | SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 3 year S&S |  |  |

The IBM Security Key Lifecycle Manager software is available from Lenovo using the ordering information listed in the following table.

Table 20. IBM Security Key Lifecycle Manager licenses

| Part number | Description  |
|-------------|--|
| 7S0A007FWW  | IBM Security Key Lifecycle Manager Basic Edition Install License + SW Subscription & Support 12 Months                                   |
| 7S0A007HWW  | IBM Security Key Lifecycle Manager For Raw Decimal Terabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months    |
| 7S0A007KWW  | IBM Security Key Lifecycle Manager For Raw Decimal Petabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months    |
| 7S0A007MWW  | IBM Security Key Lifecycle Manager For Usable Decimal Terabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months |
| 7S0A007PWW  | IBM Security Key Lifecycle Manager For Usable Decimal Petabyte Storage Resource Value Unit License + SW Subscription & Support 12 Months |

## **Controllers for internal storage**

The following table lists the storage controllers and options for internal storage of the SR250 server.

Table 21. RAID controllers and HBAs for internal storage

| Part<br>number | Feature code                    | Description   | Maximum quantity | I/O slots supported |  |  |
|----------------|---------------------------------|---|------------------|---------------------|--|--|
| 6 Gbps SATA    | controllers                     |   |                  |                     |  |  |
| None*          | None*                           | Onboard AHCI (non-RAID) / Intel RSTe (RAID)         | 1                | -                   |  |  |
| 12 Gb SAS/S    | 12 Gb SAS/SATA RAID controllers |   |                  |                     |  |  |

| NVMe PCle a    | NVMe PCIe adapters (non-RAID) |   |                  |                     |  |  |  |  |
| 7Y37A01081     | AUV2                          | ThinkSystem 1610-4P NVMe Switch Adapter                   | 1                | 2                   |  |  |  |  |

<sup>\*</sup> The onboard SATA controller integrated into the Intel C246 Platform Controller Hub (PCH) supports non-RAID (JBOD) AHCI mode or a hardware-assist, software RAID feature (Intel Rapid Storage Technology Enterprise [RSTe]).

For a comparison of the functions of the supported storage adapters, see the ThinkSystem RAID Adapter and HBA Reference:

https://lenovopress.com/lp1288-thinksystem-raid-adapter-and-hba-reference#sr250-support=SR250

#### Configuration notes:

- The onboard SATA controller does not consume a PCle slot.
- SAS RAID controllers and HBAs for internal storage are supported in the following PCIe slots:
  - PCle slot 2 on the PCle x8/x8 Riser Card (feature code B418):
    - No additional PCle adapters are installed
    - One additional PCle adapter is installed in the server in the PCle slot 1
  - PCle slot 3 on the system board:
    - Two additional PCle adapters are installed in the server in the PCle slots 1 and 2
    - A GPU adapter is installed in the server in the PCle slot 2
    - The PCle x16 Riser Card (feature code B417) is installed in the server
- The total quantity of the RAID 730-8i 2GB, 930-8i, 930-16i, and 930-8e controllers in the server must not exceed 1 (up to 1 supercapacitor can be mounted in the server).
- The 1610-4P NVMe Switch Adapter is supported in the PCle slot 2 supplied by the PCle x8 or x16 riser card.
- The 1610-4P NVMe Switch Adapter provides two PCIe 3.0 x4 ports for JBOD (non-RAID) connectivity to U.2 NVMe PCIe SSDs in the drive bays 8 and 9.
- The onboard Intel RSTe is not supported by virtualization hypervisors, including VMware vSphere (ESXi), Linux KVM, Xen, and Microsoft Hyper-V.
- The onboard Intel RSTe supports up to eight drives in a RAID-0 or RAID-5 array, two drives in a RAID-1 array, and four drives in a RAID-10 array. In a Windows Server-based environment, the onboard Intel RSTe supports up to six drives in a RAID-0 or RAID-5 array.

For more information, see the list of Product Guides in the following categories:

- RAID adapters

- Host bus adapters http://lenovopress.com/servers/options/hba#rt=product-guide

## **Drives for internal storage**

The following tables list the drive options for internal storage of the server.

#### 2.5-inch hot-swap drives:

- 2.5-inch hot-swap 12 Gb SAS HDDs
- 2.5-inch hot-swap 6 Gb SATA HDDs
- 2.5-inch hot-swap 6 Gb SATA SSDs
- 2.5-inch hot-swap PCIe 4.0 NVMe SSDs

#### 3.5-inch hot-swap drives:

- 3.5-inch hot-swap 12 Gb SAS HDDs
- 3.5-inch hot-swap 6 Gb SATA HDDs
- 3.5-inch hot-swap 6 Gb SATA SSDs

#### Simple-swap drives:

- 3.5-inch simple-swap 6 Gb SATA HDDs
- 3.5-inch simple-swap 6 Gb SATA SSDs

#### M.2 drives:

M.2 SATA drives

**M.2 drive support**: The use of M.2 drives requires an additional adapter as described in the Internal storage section.

Table 22. 2.5-inch hot-swap 12 Gb SAS HDDs

|                | Feature  |   | SED     | Maximum  |

## **USB** memory key

For general portable storage needs, the server also supports the USB memory key option that is listed in the following table.

Table 33. USB memory key

| Part number | Feature | Description                      |
|-------------|---------|----------------------------------|
| 4X77A08621  | B8NV    | ThinkSystem 32GB USB Flash Drive |

## **Optical drives**

The server supports the external USB optical drive listed in the following table.

Table 34. External optical drive

| Part number | Feature code | Description  |
|-------------|--------------|--|
| 7XA7A05926  | AVV8         | ThinkSystem External USB DVD RW Optical Disk Drive |

The drive is based on the Lenovo Slim DVD Burner DB65 drive and supports the following formats: DVD-RAM, DVD-RW, DVD+RW, DVD+R, DVD-R, DVD-ROM, DVD-R DL, CD-RW, CD-R, CD-ROM.

## I/O expansion

The SR250 server supports up to three PCle slots: one slot on the system planar that supports an internal storage controller and up to two PCle slots on a riser card.

The slot form factors are as follows:

- Slot 1: PCle 3.0 x8; low profile (not present if the Slot 2 is x16)
- Slot 2: PCle 3.0 x8 (x16 physical connector) or x16; full-height, half-length
- Slot 3 PCIe 3.0 x4 (x8 physical connector; supports an internal storage controller)

The locations of the PCIe slots are shown in the following figure.

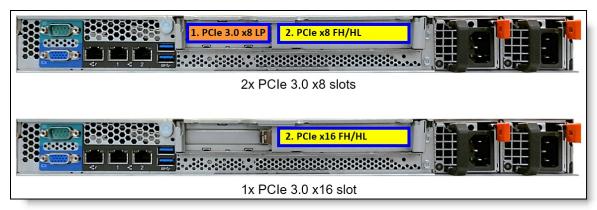

Figure 8. Slot locations

The following table lists available PCle riser card options.

Table 35. PCIe riser cards

| Description                               | Part number |      | Maximum quantity |
|---|-------------|------|------------------|
| ThinkSystem SR250/SR150 PCIe x16/x8 Riser | 4C57A12111  | B418 | 1                |
| ThinkSystem SR250 PCIe x16 Riser          | 4C57A12110  | B417 | 1                |

## **Configuration notes:**

- A riser card is required.
- The PCIe x8 riser card supplies slots 1 and 2, and the PCIe x16 riser card supplies slot 2.

#### **Network adapters**

The SR250 server supports two onboard Gigabit Ethernet network ports that are based on the Broadcom BCM5720 network interface controller (NIC) chip.

The integrated NIC has the following features:

- Two 10/100/1000 Mb Ethernet RJ-45 ports
- NIC Teaming (load balancing and failover)
- IEEE 802.3ad Link Aggregation
- I/O Virtualization (IOV) for VMWare NetQueue and Microsoft VMQ
- IEEE 802.1Q Virtual Local Area Networks (VLANs)
- IEEE 802.3x flow control
- TCP, IP, and UDP checksum offload
- Large Send Offload (LSO) and TCP Segmentation Offload (TSO)
- Receive Side Scaling (RSS) and Transmit Side Scaling (TSS)
- Jumbo frames up to 9600 bytes
- IEEE 802.3az-2010 Energy Efficient Ethernet (EEE) compliant
- Hardware assist for IEEE 1588 and IEEE 802.1AS time synchronization implementations
- Preboot eXecution Environment (PXE) and iSCSI remote boot options

The following table lists the network adapters that are supported with the SR250 server.

Table 36. Network adapters

<sup>\*</sup> The adapter comes without transceivers or cables; for ordering information, see the adapter product guide.

#### Configuration notes:

- PCIe full-height network adapters are supported in the full-height PCIe slot 2 supplied by the PCIe x8 or x16 riser card.
- PCIe Low Profile network adapters are supported in the full-height and low profile slots supplied by the PCIe x8 or x16 riser card.
- Supported transceivers or DAC cables should be purchased for the SFP+ and SFP28 adapters, and UTP Category 6 or Category 5e cables should be purchased for the 10 GbE (Cat6) or 1 GbE (Cat5e or Cat6) RJ-45 adapters. The maximum number of transceivers or cables that are supported per adapter equals the quantity of the adapter ports, and all adapter ports must have the same type of the transceiver or cable selected.

For more information, see the list of Product Guides in the Ethernet Adapters category: http://lenovopress.com/servers/options/ethernet#rt=product-guide

## SAS adapters for external storage

The following table lists SAS RAID controllers and HBAs for external storage attachments that are supported by the SR250 server.

Table 37. SAS RAID adapters and HBAs for external storage

| Description   | Part<br>number | Feature code | Maximum quantity | I/O slots<br>supported |
|---|----------------|--------------|------------------|------------------------|
| 12 Gbps SAS RAID adapters                           |                |              |                  |                        |
| ThinkSystem RAID 930-8e 4GB Flash PCle 12Gb Adapter | 7Y37A01087     | AUNQ         | 1                | 1, 2                   |
| 12 Gbps SAS HBAs                                    |                |              |                  |                        |
| ThinkSystem 430-8e SAS/SATA 12Gb HBA                | 7Y37A01090     | AUNR         | 1                | 1, 2                   |
| ThinkSystem 430-16e SAS/SATA 12Gb HBA               | 7Y37A01091     | AUNN         | 1                | 1, 2                   |

#### Configuration notes:

- Low profile SAS RAID controllers and HBAs for external storage are supported in the low profile and full-high PCIe slots supplied by the x8 or x16 riser card.
- The total quantity of the RAID 730-8i 2GB, 930-8i, 930-16i, and 930-8e controllers in the server must not exceed 1 (up to 1 supercapacitor can be mounted in the server).

#### Mixing storage adapter families: The following HBA/RAID adapter combinations are supported:

- X30 external adapters with other X30 adapters (internal or external)
- X40 external adapters with other X40 adapters (internal or external)
- X40 external adapters with X350 internal adapters (support planned for November 2022, 22C)

The following HBA/RAID adapter combinations are *not* supported:

- X30 adapters (internal or external) with X40 adapters (internal or external)
- X30 adapters (internal or external) with X350 internal adapters

The following table summarizes features of supported RAID controllers and HBAs for external storage.

Table 38. Features and specifications of the RAID controllers and HBAs for external storage

| Feature             | RAID 930-8e | 430-8e HBA | 430-16e HBA |
|---------------------|-------------|------------|-------------|
| Form factor         | PCle LP     | PCIe LP    | PCIe LP     |
| SAS controller chip | SAS3516     | SAS3408    | SAS3416     |

| Feature                         | RAID 930-8e             | 430-8e HBA     | 430-16e HBA    |
|---------------------------------|-------------------------|----------------|----------------|
| Host interface                  | PCIe 3.0 x8             | PCIe 3.0 x8    | PCIe 3.0 x8    |
| Port interface                  | 12 Gb SAS               | 12 Gb SAS      | 12 Gb SAS      |
| Number of ports                 | 8                       | 8              | 16             |
| Connector type                  | SFF-8644 x4             | SFF-8644 x4    | SFF-8644 x4    |
| Number of connectors            | 2                       | 2              | 4              |
| Drive interface                 | SAS, SATA               | SAS, SATA      | SAS, SATA      |
| Drive type                      | HDD, SSD, SED           | HDD, SSD, SED* | HDD, SSD, SED* |
| Hot-swap drive support          | Yes                     | Yes            | Yes            |
| Number of devices               | 240                     | 1024           | 1024           |
| RAID levels                     | 0/1/10/5/50/6/60        | None           | None           |
| JBOD mode                       | Yes                     | Yes            | Yes            |
| Cache                           | 4 GB                    | None           | None           |
| Cache protection                | Flash backup (Included) | None           | None           |
| SED key management (SafeStore)  | Yes                     | No             | No             |
| SSD I/O acceleration (FastPath) | Yes                     | No             | No             |
| SSD Caching (CacheCade Pro 2.0) | No**                    | No             | No             |
| Consistency check               | Yes                     | No             | No             |
| Patrol read                     | Yes                     | No             | No             |
| Online capacity expansion       | Yes                     | No             | No             |
| Online RAID level migration     | Yes                     | No             | No             |
| Global Hot Spare                | Yes                     | No             | No             |
| Auto-rebuild                    | Yes                     | No             | No             |

<sup>\*</sup> HBAs do not support key management for SEDs; third-party host software is responsible for managing the keys.

For more information, see the list of Product Guides in the following categories:

- RAID adapters http://lenovopress.com/servers/options/raid#rt=product-guide
- Host bus adapters http://lenovopress.com/servers/options/hba#rt=product-guide

## Fibre Channel host bus adapters

The following table lists Fibre Channel HBAs supported by the SR250 server.

Table 39. Fibre Channel HBAs

| Description                         | Part<br>number | Feature code | Maximum quantity | I/O slots supported |
|-------------------------------------|----------------|--------------|------------------|---------------------|
| Emulex 16Gb Gen6 FC Single-port HBA | 01CV830        | ATZU         | 2                | 1, 2                |
| Emulex 16Gb Gen6 FC Dual-port HBA   | 01CV840        | ATZV         | 2                | 1, 2                |

**Configuration note:** FC HBAs are supported in the low profile and full-high PCIe slots supplied by the PCIe x8 or x16 riser card.

For more information, see the list of Product Guides in the Host bus adapters category: http://lenovopress.com/servers/options/hba#rt=product-guide

<sup>\*\*</sup> The SSD caching feature has been phased out in the new generation of advanced RAID controllers.

## **GPU** adapters

The SR250 does not support any GPUs that are currently available.

## Cooling

The SR250 server ships with four non-hot-swap system fans.

Configuration note: The server performance might be impacted in case of a system fan failure.

## Power supplies and cables

The SR250 server supports one fixed power supply or up to two redundant hot-swap power supplies. With two power supplies, the server is capable of N+N redundancy depending on the configuration. A second power supply can be added to the models that come with one hot-swap power supply.

The following table lists the power supply options.

Table 41. Power supplies

| Description   | Part<br>number | Feature code | Maximum quantity |
|---|----------------|--------------|------------------|
| ThinkSystem SR250/SR150 Fixed 300W Power Supply                   | None*          | B40Q         | 1                |
| ThinkSystem 450W (230V/115V) Platinum Hot-Swap Power Supply       | 4P57A12649     | B40R         | 2                |
| ThinkSystem 450W (230V/115V) Platinum Hot-Swap Power Supply India | 4P57A16264     | B5LC         | 2                |

<sup>\*</sup> Factory-installed only.

#### Configuration notes:

- Configurations with 300 W fixed power supplies (feature code B40Q) are supported only for Machine Types 7Y51, 7Y52, and 7Y73.
- Configurations with 450 W hot-swap power supplies (4P57A12649) that are available worldwide (except India) are supported only for Machine Types 7Y51 and 7Y52.
- Configurations with 450 W hot-swap power supplies for India (4P57A16264) are supported only for Machine Type 7Y72.
- To ensures that the properly sized power supply is chosen for optimal performance, it is highly recommended to validate system configuration for specific power requirements by using the latest version of the Lenovo Capacity Planner: http://datacentersupport.lenovo.com/us/en/solutions/lnvo-lcp

The SR250 server ship standard with or without a power cord (model dependent). A hot-swap power supply option ships without a power cord.

The following table lists the line cords and rack power cables that can be ordered for the SR250 server. One or two power cables can be ordered, depending on the quantity of power supplies in the server.

Table 42. Power cables

| Description  | Part<br>number | Feature code |
|--|----------------|--------------|
| Rack power cables  |                |              |
| 1.0m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable      | 00Y3043        | A4VP         |
| 1.5m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable      | 39Y7937        | 6201         |
| 2.0m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable      | 4L67A08365     | B0N4         |
| 2.0m, 13A/125V-10A/250V, C13 to IEC 320-C14 Rack Power Cable | 4L67A08369     | 6570         |

| Description  | Part number | Feature code |  |  |
|--|-------------|--------------|--|--|
| 2.8m, 10A/100-250V, C13 to IEC 320-C14 Rack Power Cable      | 4L67A08366  | 6311         |  |  |

# **Systems management**

The SR250 supports the following systems management tools:

- Lenovo XClarity Controller
- Lenovo XClarity Provisioning Manager
- Lenovo XClarity Essentials
- Lenovo XClarity Administrator
- Lenovo XClarity Integrators
- Lenovo XClarity Energy Manager
- Lenovo Capacity Planner

## **Lenovo XClarity Controller**

The SR250 server contains Lenovo XClarity Controller (XCC), which provides advanced service-processor control, monitoring, and alerting functions. XClarity Controller offers three functional levels: Standard, Advanced, and Enterprise.

By default, the SR250 server includes XClarity Controller Standard features, and it can be upgraded to Advanced or Enterprise functionality by using the Features on Demand (FoD) upgrades.

XClarity Controller Standard offers the following capabilities:

- · Gathering and viewing system information and inventory
- Monitoring system status and health
- Alerting and notifications
- Event logging
- Configuring network connectivity
- Configuring security
- Updating system firmware
- Configuring server settings and devices
- Real-time power usage monitoring
- Remotely controlling server power (Power on, Power off, Restart)
- Managing FoD activation keys
- Redirecting serial console via IPMI
- Capturing the video display contents when an operating system hang condition is detected

XClarity Controller Advanced Upgrade adds the following functionality to the Standard features:

- Remotely viewing video with the following graphics resolutions:
  - Up to 1600x1200 with up to 23 bits per pixel; or
  - Up to 1920x1200 with up to 15 bits per pixel
- Remotely accessing the server using the keyboard and mouse from a remote client
- Remotely deploying an operating system
- Syslog alerting
- · Redirecting serial console via SSH
- Displaying graphics for real-time and historical power usage data and temperature

XClarity Controller Enterprise Upgrade adds the following functionality to the Advanced features:

- · Capping power usage
- Mapping the ISO and image files located on the local client as virtual drives for use by the server
- Mounting the remote ISO and image files via HTTPS, SFTP, CIFS, and NFS
- Collaborating across up to six users of the virtual console
- · Controlling quality and bandwidth usage

The XClarity Controller provides remote server management through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3
- Common Information Model (CIM)
- Data Center Manageability Interface (DCMI) Version 1.5
- Redfish REpresentational State Transfer (REST) API
- Web browser with HTML5 support
- Command-line interface
- Virtual Operator Panel with XClarity Mobile App via the front USB port with XClarity Controller access

Virtual Operator Panel provides quick access to system status, firmware, network, health, and alerts information. With proper authentication, it also allows to configure systems management and network settings and to control system power (Power on, Power off, Restart). The Virtual Operator Panel can be accessed from the XClarity Mobile App running on the Android or iOS mobile device that is connected to the front USB port with XClarity Controller access (See Components and connectors).

**Note:** Depending on the system settings, the front USB port can be assigned to XClarity Controller for management functions, or to the system as a regular USB 2.0 port, or switched between two functions by using the system ID button.

IPMI via the Ethernet port (IPMI over LAN) is supported, however it is disabled by default. For CTO orders you can specify whether you want to the feature enabled or disabled in the factory, using the feature codes listed in the following table.

Table 43. IPMI-over-LAN settings

| Part number | Feature code | Description                     |
|-------------|--------------|---------------------------------|
| CTO only    | B7XZ         | Disable IPMI-over-LAN (default) |
| CTO only    | B7Y0         | Enable IPMI-over-LAN            |

The following table lists the XClarity Controller FoD upgrades.

Table 44. XClarity Controller FoD upgrades

| Description  | Part<br>number | Feature code | Maximum quantity |
|--|----------------|--------------|------------------|
| ThinkSystem XClarity Controller Standard to Advanced Upgrade   | 4L47A09132     | AVUT         | 1                |
| ThinkSystem XClarity Controller Standard to Enterprise Upgrade | None*          | AUPW         | 1                |
| ThinkSystem XClarity Controller Advanced to Enterprise Upgrade | 4L47A09133     | None**       | 1                |

<sup>\*</sup> Factory-installed only.

#### Configuration notes:

- For factory-installed upgrades, either Standard to Advanced Upgrade (feature AVUT) or Standard to Enterprise Upgrade (feature AUPW) can be selected, but not both.
- For field upgrades, the Advanced to Enterprise Upgrade (4L47A09133) requires the Standard to Advanced Upgrade to be activated on the server previously with either the factory-installed feature AVUT or field upgrade 4L47A09132.

<sup>\*\*</sup> Field-upgrade only.

### **Lenovo XClarity Provisioning Manager**

Lenovo XClarity Provisioning Manager is a UEFI-embedded GUI application that combines the functions of configuring system setup settings, configuring RAID, and updating applications and firmware. It also enables you to install the supported operating systems and associated device drivers, run diagnostics, and collect service data.

Lenovo XClarity Provisioning Manager has the following features:

- Automatic hardware detection
- Collecting and viewing system inventory information
- Configuring UEFI system setup settings
- Updating the system firmware
- Configuring RAID by using the RAID Setup Wizard or Advanced mode
- Installing an operating system and device drivers automatically or manually
- · Running diagnostics and collecting service data

### **Lenovo XClarity Essentials**

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- Lenovo XClarity Essentials OneCLI
   OneCLI is a collection of server management tools that utilize a command line interface program to
   manage firmware, hardware, and operating systems. It provides functions to collect full system health
   information (including health status), configure system setting, and update system firmware and drivers.
- Lenovo XClarity Essentials UpdateXpress
   The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.
- Lenovo XClarity Essentials Bootable Media Creator
   The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page: http://support.lenovo.com/us/en/documents/LNVO-center

### **Lenovo XClarity Administrator**

Lenovo XClarity is a centralized systems management solution that helps administrators deliver infrastructure faster. This solution integrates easily with Lenovo x86 servers, certified nodes, appliances, RackSwitch switches, and select Lenovo storage, providing automated agent-less discovery, monitoring, firmware updates, configuration management, and bare metal deployment of operating systems and hypervisors across multiple servers.

Lenovo XClarity Administrator is an optional software component for the SR250 server which can be downloaded and used at no charge to discover and monitor the SR250 and manage firmware upgrades for them.

If software support is required for Lenovo XClarity Administrator, or Lenovo XClarity Administrator premium features (such as configuration management and operating system deployment) are required, or both, Lenovo XClarity Pro software subscription should be ordered. Lenovo XClarity Pro is licensed on a per managed system basis, that is, each managed Lenovo system requires a license.

The following table lists the geo-specific Lenovo XClarity software license options.

Table 45. Lenovo XClarity software options

| Description   | Part number<br>(NA, AP, Japan)* | Part number<br>(EMEA, LA)** | Quantity |
|---|---------------------------------|-----------------------------|----------|
| Lenovo XClarity Pro, per Managed Endpoint w/1 Yr SW S&S | 00MT201                         | 00MT207                     | 1        |
| Lenovo XClarity Pro, per Managed Endpoint w/3 Yr SW S&S | 00MT202                         | 00MT208                     | 1        |
| Lenovo XClarity Pro, per Managed Endpoint w/5 Yr SW S&S | 00MT203                         | 00MT209                     | 1        |

<sup>\*</sup> NA = North America; AP = Asia Pacific

Lenovo XClarity Administrator offers the following standard features that are available at no charge:

- Auto-discovery and monitoring of Lenovo x86 servers, appliances, certified nodes, RackSwitch switches, Flex System chassis, and select Lenovo storage systems
- Firmware updates and compliance enforcement
- External alerts and notifications via SNMP traps, syslog remote logging, and e-mail
- · Secure connections to managed endpoints
- NIST 800-131A or FIPS 140-2 compliant cryptographic standards between the management solution and managed endpoints
- Integration into existing higher-level management systems such as cloud automation and orchestration tools through REST APIs, providing extensive external visibility and control over hardware resources
- An intuitive, easy-to-use GUI
- Scripting with Windows PowerShell, providing command-line visibility and control over hardware resources

Lenovo XClarity Administrator offers the following premium features that require an optional Pro license:

- Pattern-based configuration management that allows to define configurations once and apply repeatedly
  without errors when deploying new servers or redeploying existing servers without disrupting the fabric
- Bare-metal deployment of operating systems and hypervisors to streamline infrastructure provisioning

For more information, refer to the Lenovo XClarity Administrator Product Guide: http://lenovopress.com/tips1200

### **Lenovo XClarity Integrators**

Lenovo offers at no charge (if software support is required, a Lenovo XClarity Pro software subscription license should be ordered) two software plug-in modules, Lenovo XClarity Integrators, to manage physical infrastructure from leading external virtualization management software tools from Microsoft and VMware:

- Lenovo XClarity Integrator for Microsoft System Center
- Lenovo XClarity Integrator for VMware vCenter

Lenovo XClarity Integrators offer the following additional features:

- Ability to discover, manage, and monitor Lenovo server hardware from VMware vCenter or Microsoft System Center
- Deployment of firmware updates and configuration patterns to Lenovo x86 rack servers and Flex System from the virtualization management tool
- Non-disruptive server maintenance in clustered environments that reduces workload downtime by dynamically migrating workloads from affected hosts during rolling server updates or reboots
- Greater service level uptime and assurance in clustered environments during unplanned hardware events by dynamically triggering workload migration from impacted hosts when impending hardware

<sup>\*\*</sup> EMEA = Europe, Middle East, Africa; LA = Latin America

#### failures are predicted

For more information, refer to the Lenovo XClarity web page:

https://www.lenovo.com/us/en/data-center/software/management/

### **Lenovo XClarity Energy Manager**

Lenovo XClarity Energy Manager provides a stand-alone, web-based agent-less power management console that provides real time data and enables you to observe, plan and manage power and cooling for Lenovo servers. Using built-in intelligence, it identifies server power consumption trends and ideal power settings and performs cooling analysis so that you can define and optimize power-saving policies.

Lenovo XClarity Energy Manager offers the following capabilities:

- · Monitors room, row, rack, and device levels in the data center
- · Reports vital server information, such as power, temperature and resource utilization
- Monitors inlet temperature to locate hot spots, reducing the risk of data or device damage
- Provides finely-grained controls to limit platform power in compliance with IT policy
- Generates alerts when a user-defined threshold is reached

Lenovo XClarity Energy Manager is an optional software component for the SR250 server that is licensed on a per managed node basis, that is, each managed server requires a license. The 1-node Energy Manager license is included in the XClarity Controller Enterprise upgrade.

To manage systems without XClarity Controller Enterprise licenses, a node license pack should be purchased. The following table lists the geo-specific Lenovo XClarity Energy Manager software license options.

Table 46. Lenovo XClarity Energy Manager software options

| Description  | Part number<br>(NA, AP, Japan)* | Part number<br>(EMEA, LA)** | Quantity |
|--|---------------------------------|-----------------------------|----------|
| Lenovo XClarity Energy Manager, 1 Node w/ 1 Yr S&S | 01DA225                         | 01DA228                     | 1        |

<sup>\*</sup> NA = North America; AP = Asia Pacific.

For more information, refer to the Lenovo XClarity Energy Manager web page:

http://datacentersupport.lenovo.com/us/en/solutions/Invo-lxem

### **Lenovo Capacity Planner**

Lenovo Capacity Planner is a power consumption evaluation tool that enhances data center planning by enabling IT administrators and pre-sales professionals to understand various power characteristics of racks, servers, and other devices. Capacity Planner can dynamically calculate the power consumption, current, British Thermal Unit (BTU), and volt-ampere (VA) rating at the rack level, improving the planning efficiency for large scale deployments.

For more information, refer to the Capacity Planner web page:

http://datacentersupport.lenovo.com/us/en/solutions/Invo-lcp

# Security

The SR250 server offers the following security features:

- · Power-on password
- · Administrator's password
- Secure firmware updates
- Onboard Trusted Platform Module (TPM) version 1.2 or 2.0 (configurable UEFI system setting)
- Nationz Trusted Platform Module v2.0 (optional; PRC only)
- Lockable front bezel (optional)
- Self-encrypting drives (SEDs) with support for enterprise key managers see the SED encryption key

<sup>\*\*</sup> EMEA = Europe, Middle East, Africa; LA = Latin America.

#### management section

• Lenovo Business Vantage security software (optional; PRC only)

The server is NIST SP 800-147B compliant.

The following table lists the security options that are available for the SR250 server.

Table 47. Security options

| Description                                      | Part<br>number | Feature code | Maximum quantity |
|--|----------------|--------------|------------------|
| Lockable front bezel                             |                |              |                  |
| ThinkSystem 1U Security Bezel                    | 7Z17A02581     | AUWR         | 1                |
| Trusted Platform Module (PRC only)               |                |              |                  |
| ThinkSystem Nationz Trusted Platform Module v2.0 | None*          | B22N         | 1                |

<sup>\*</sup> Factory-installed only; no field upgrade.

Lenovo Business Vantage is a security software tool suite (available only in PRC) designed to work with the Nationz TPM for enhanced security, to keep user data safe, and to erase confidential data completely from a hard disk drive.

Lenovo Business Vantage provides the following features:

- Encrypts files to ensure data safety by using the Nationz TPM.
- Erases confidential data from a hard disk.
- Prohibits unauthorized access to the USB port of devices.
- Encrypts files to ensure data security on a USB storage device.

For more information, refer to the Lenovo Business Vantage web page:

http://support.lenovo.com.cn/lenovo/wsi/es/es.html

## **Intel Transparent Supply Chain**

Add a layer of protection in your data center and have peace of mind that the server hardware you bring into it is safe authentic and with documented, testable, and provable origin.

Lenovo has one of the world's best supply chains, as ranked by Gartner Group, backed by extensive and mature supply chain security programs that exceed industry norms and US Government standards. Now we are the first Tier 1 manufacturer to offer Intel® Transparent Supply Chain in partnership with Intel, offering you an unprecedented degree of supply chain transparency and assurance.

To enable Intel Transparent Supply Chain for the Intel-based servers in your order, add the following feature code in the DCSC configurator, under the Security tab.

Table 48. Intel Transparent Supply Chain ordering information

| Feature code | Description                    |
|--------------|--------------------------------|
| BB0P         | Intel Transparent Supply Chain |

For more information on this offering, see the paper *Introduction to Intel Transparent Supply Chain on Lenovo ThinkSystem Servers*, available from https://lenovopress.com/lp1434-introduction-to-intel-transparent-supply-chain-on-thinksystem-servers.

### **Rack installation**

The following table lists the rack installation options that are available for the SR250 server.

Table 49. Rack installation options

|                  | Feature |   | Maximum  |
|------------------|---------|---|----------|
| Part number      | code    | Description   | quantity |
| 4-post rail kits |         |   |          |
| 4M17A13564       | B42B    | ThinkSystem Tool-less Friction Rail v2                      | 1        |
| 4M17A37605       | B7L3    | ThinkSystem Short Rack Rail Kit                             | 1        |
| 2-post rail kits |         |   |          |
| 4M17A37105       | B6H2    | ThinkSystem Friction 2-Post Screw-in Rail Kit               | 1        |
| Front VGA por    | rt      |   |          |
| 4Z57A80508       | BMQ0    | ThinkSystem SR250/SR150/SR250 V2 Front VGA Connector Kit v2 | 1        |
| 4Z57A12653       | B419    | ThinkSystem SR250/SR150 Front VGA Connector Kit             | 1        |

The following table summarizes the rail kit features and specifications.

Table 50. Rail kit features and specifications summary

| Feature   | 4-Post Tool-less Rail Kit                       | 4-Post Short Rail Kit                    | 2-Post Screw-in Rail Kit               |
|---|---|--|--|
| Part number                                       | 4M17A13564                                      | 4M17A37605                               | 4M17A37105                             |
| CMA   | None  | None                                     | None                                   |
| Rail length                                       | 751.2 mm (29.6 in.)                             | 484.0 mm (19.1 in.)                      | 486.2 mm (19.2 in.)                    |

| Mounting flange thickness                         | 2 mm (0.08 in.) –<br>3.3 mm (0.13 in.)          | 2 mm (0.08 in.) –<br>3.3 mm (0.13 in.)   | 2 mm (0.08 in.) –<br>3.3 mm (0.13 in.) |
| Distance between front and rear mounting flanges^ | 609.6 mm (24 in.) –<br>863.6 mm (34 in.)        | 355.6 mm (14 in.) –<br>609.6 mm (24 in.) | Not applicable                         |

<sup>\*</sup> If a 0U PDU used, the rack cabinet must be at least 1000 mm (39.37 in.) deep.

^ Measured when mounted on the rack cabinet, from the front surface of the front mounting flange to the rear most point of the rail.

# **Operating system support**

The server supports the following operating systems:

- Microsoft Windows Server 2016
- Microsoft Windows Server 2019
- Microsoft Windows Server 2022
- Red Hat Enterprise Linux 7.7
- Red Hat Enterprise Linux 7.8
- Red Hat Enterprise Linux 7.9
- Red Hat Enterprise Linux 8.1
- Red Hat Enterprise Linux 8.2
- Red Hat Enterprise Linux 8.3
- Red Hat Enterprise Linux 8.4
- Red Hat Enterprise Linux 8.5
- Red Hat Enterprise Linux 8.6
- Red Hat Enterprise Linux 9.0
- SUSE Linux Enterprise Server 12 SP5
- SUSE Linux Enterprise Server 12 Xen SP5
- SUSE Linux Enterprise Server 15 SP1
- SUSE Linux Enterprise Server 15 SP2
- SUSE Linux Enterprise Server 15 SP3
- SUSE Linux Enterprise Server 15 SP4
- SUSE Linux Enterprise Server 15 Xen SP1
- SUSE Linux Enterprise Server 15 Xen SP2
- SUSE Linux Enterprise Server 15 Xen SP3
- SUSE Linux Enterprise Server 15 Xen SP4
- VMware ESXi 6.5 U3
- VMware ESXi 6.7 U3
- VMware ESXi 7.0
- VMware ESXi 7.0 U1
- VMware ESXi 7.0 U2
- VMware ESXi 7.0 U3

For a complete list of supported, certified and tested operating systems, plus additional details and links to relevant web sites, see the Operating System Interoperability Guide: https://lenovopress.com/osig#servers=sr250-7y51-7y52-e-2200

For configure-to-order configurations, the server can be preloaded with VMware ESXi. Ordering information is listed in the following table.

Table 51. VMware ESXi preload

| Part number | Feature code | Description                            |
|-------------|--------------|--|
| CTO only    | B6U0         | VMware ESXi 6.5 U3 (factory installed) |
| CTO only    | B88T         | VMware ESXi 6.7 U3 (factory installed) |
| CTO only    | BBZG         | VMware ESXi 7.0 (Factory Installed)    |
| CTO only    | BE5E         | VMware ESXi 7.0 U1 (Factory Installed) |
| CTO only    | BHSR         | VMware ESXi 7.0 U2 (Factory Installed) |
| CTO only    | BMEY         | VMware ESXi 7.0 U3 (Factory Installed) |

# Physical specifications

The SR250 has the following overall physical dimensions, excluding components that extend outside the standard chassis, such as EIA flanges, front security bezel (if any), and power supply handles:

• Width: 435 mm (17.1 inches)

Height: 43 mm (1.7 inches)Depth: 545 mm (21.5 inches)

The following table lists the detailed dimensions. See the figure below for the definition of each dimension.

Table 52. Detailed dimensions

| Dimension | Description  |
|-----------|--|
| 482 mm    | X <sub>a</sub> = Width, to the outsides of the front EIA flanges   |
| 435 mm    | X <sub>b</sub> = Width, to the rack rail mating surfaces   |
| 435 mm    | X <sub>c</sub> = Width, to the outer most chassis body feature   |
| 43 mm     | Y <sub>a</sub> = Height, from the bottom of chassis to the top of the chassis  |
| 501 mm    | Z <sub>a</sub> = Depth, from the rack flange mating surface to the rearmost I/O port surface                                   |
| 509 mm    | Z <sub>b</sub> = Depth, from the rack flange mating surface to the rearmost feature of the chassis body                        |
| 523 mm    | Z <sub>c</sub> = Depth, from the rack flange mating surface to the rearmost feature such as power supply handle                |
| 36 mm     | Z <sub>d</sub> = Depth, from the forwardmost feature on front of EIA flange to the rack flange mating surface                  |
| 47 mm     | $Z_{\rm e}$ = Depth, from the front of security bezel (if applicable) or forwardmost feature to the rack flange mating surface |

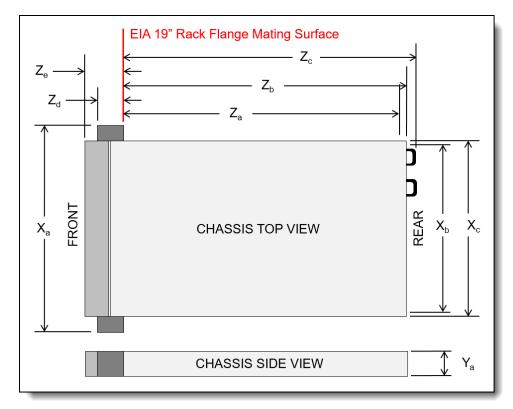

Figure 9. Server dimensions

The shipping dimensions (cardboard packaging) of the SR250 are as follows:

Width: 186 mm (7.3 inches)Height: 879 mm (34.6 inches)Depth: 600 mm (23.6 inches)

The SR250 server has the following weight:

• Base configuration: 9.1 kg (20.1 lb)

• Maximum configuration: 12.3 kg (27.1 lb)

# **Operating environment**

The SR250 server complies with ASHRAE class A2 specifications. The server performance might be impacted when the operating temperature is outside the ASHRAE A2 specifications or in case of a system fan failure. Depending on the hardware configuration, some server models comply with ASHRAE class A3 specifications. To comply with ASHRAE class A3 specifications, the SR250 server models must be configured with 8x 2.5-inch hot-swap drive bays and a processor with up to 80 W TDP.

The SR250 server is supported in the following environment:

- Air temperature:
  - Operating:
    - ASHRAE Class A3: 5 °C 40 °C (41 °F 104 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 175-m (574-ft) increase in altitude
    - ASHRAE Class A2: 10 °C 35 °C (50 °F 95 °F); for altitudes above 900 m (2,953 ft), decrease the maximum ambient temperature by 1 °C for every 300-m (984-ft) increase in altitude
  - Non-operating: 5 °C 45 °C (41 °F 113 °F)
  - Storage: -40 °C +60 °C (-40 °F 140 °F)
- Maximum altitude: 3050 m (10,000 ft)
- Humidity:
  - · Operating:
    - ASHRAE Class A3: 8% 85% (non-condensing); maximum dew point: 24 °C (75 °F)
    - ASHRAE Class A2: 8% 80% (non-condensing); maximum dew point: 21 °C (70 °F)
  - Storage: 8% 90% (non-condensing)
- Electrical:
  - 100 127 (nominal) V AC; 50 Hz / 60 Hz
  - 200 240 (nominal) V AC; 50 Hz / 60 Hz
- · Acoustics:
  - Minimum configuration:
    - Operating: 5.3 bels
    - Idle: 4.9 bels
  - Maximum configuration:
    - Operating: 5.7 bels
    - Idle: 5.4 bels
- Vibration:
  - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
  - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- · Shock:
  - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
  - Non-operating: 50 G for 152 in./sec velocity change across 6 surfaces

The following table lists the maximum system power load, rated inlet current, and system heat output based on the power supply and source voltage.

Table 53. Rated system power, inlet current, and system heat output

| Power supply         | Source voltage | Maximum power load per system | Rated current per inlet | System heat output |
|----------------------|----------------|-------------------------------|-------------------------|--------------------|
| 300 W Gold           | 100 - 127 V AC | 334 W                         | 4 A                     | 1139 BTU/hour      |
| (One power supply)   | 200 - 240 V AC | 326 W                         | 2 A                     | 1111 BTU/hour      |
| 450 W Platinum       | 100 - 127 V AC | 503 W                         | 5.8 A                   | 1717 BTU/hour      |
| (Two power supplies) | 200 - 240 V AC | 484 W                         | 2.9 A                   | 1650 BTU/hour      |

# Warranty and support

The SR250 server comes with a three-year (Machine Type 7Y51) or one-year (Machine Type 7Y52) customer-replaceable unit (CRU) and onsite limited (for field-replaceable units [FRUs] only) warranty with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.

Lenovo's additional support services provide a sophisticated, unified support structure for a customer's data center, with an experience consistently ranked number one in customer satisfaction worldwide. The following Lenovo support services are available:

- Premier Support provides a Lenovo-owned customer experience and delivers direct access to technicians skilled in hardware, software, and advanced troubleshooting, in addition to the following capabilities:
  - Direct technician-to-technician access through a dedicated phone line.
  - 24x7x365 remote support.
  - Single point of contact service.
  - End to end case management.
  - 3rd Party collaborative software support.
  - Online case tools and live chat support.
  - On-demand remote system analysis.
- Warranty Upgrades (Preconfigured Support) are available to meet the on-site response time targets that match the criticality of customer's systems:
  - 3, 4, or 5 years of service coverage.
  - 1-year or 2-year post-warranty extensions.
  - **Foundation Service**: 9x5 service coverage with next business day onsite response, with optional YourDrive YourData.
  - **Essential Service**: 24x7 service coverage with 4-hour onsite response or 24-hour committed repair (available only in select regions), bundled with YourDrive YourData.
  - Advanced Service: 24x7 service coverage with 2-hour onsite response or 6-hour committed repair (available only in select regions), bundled with YourDrive YourData.

### Managed Services

Lenovo Managed Services provide continuous 24x7 remote monitoring (plus 24x7 call center availability) and proactive management of a customer's data center using state of the art tools, systems, and practices by a team of highly skilled and experienced Lenovo services professionals.

Quarterly reviews check error logs, verify firmware and operating system device driver levels, and software as needed. Lenovo will also maintain records of latest patches, critical updates, and firmware levels, to ensure customer's systems are providing business value through optimized performance.

#### Technical Account Management (TAM)

A Lenovo Technical Account Manager helps customers optimize operations of their data centers based on a deep understanding of customer's business. Customers gain direct access to a Lenovo TAM, who serves as their single point of contact to expedite service requests, provide status updates, and furnish reports to track incidents over time. Also, a TAM helps proactively make service recommendations and manage service relationship with Lenovo to make certain that customer's needs are met.

# • Enterprise Software Support

Lenovo Enterprise Software Support is an additional support service that provides customers with software support on Microsoft, Red Hat, SUSE, and VMWare applications and systems. Around the clock availability for critical problems plus unlimited calls and incidents helps customers address challenges fast, without incremental costs. Support staff can answer troubleshooting and diagnostic questions, address product compatibility and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

#### YourDrive YourData

Lenovo's YourDrive YourData service is a multi-drive retention offering that ensures that customer's data is always under their control, regardless of the number of drives that are installed in their Lenovo server. In the unlikely event of a drive failure, customers retain possession of their drive while Lenovo replaces the failed drive part. Customer's data stays safely on customer premises, in their hands. The YourDrive YourData service can be purchased in convenient bundles with Foundation, Essential, or Advanced Service upgrades and extensions.

#### Health Check

Having a trusted partner who can perform regular and detailed health checks is central to maintaining efficiency and ensuring that customer systems and business are always running at their best. Health Check supports Lenovo-branded server, storage, and networking devices, as well as select Lenovo-supported products from other vendors that are sold by Lenovo or a Lenovo-Authorized Reseller.

Some regions might have different warranty terms and conditions than the standard warranty. This is due to local business practices or laws in the specific region. Local service teams can assist in explaining region-specific terms when needed. Examples of region-specific warranty terms are second or longer business day parts delivery or parts-only base warranty.

If warranty terms and conditions include onsite labor for repair or replacement of parts, Lenovo will dispatch a service technician to the customer site to perform the replacement. Onsite labor under base warranty is limited to labor for replacement of parts that have been determined to be field-replaceable units (FRUs). Parts that are determined to be customer-replaceable units (CRUs) do not include onsite labor under base warranty.

If warranty terms include parts-only base warranty, Lenovo is responsible for delivering only replacement parts that are under base warranty (including FRUs) that will be sent to a requested location for self-service. Parts-only service does not include a service technician being dispatched onsite. Parts must be changed at customer's own cost and labor and defective parts must be returned following the instructions supplied with the spare parts.

Lenovo support services are region-specific. Not all support services are available in every region. For information about Lenovo support services that are available in a specific region, refer to the following resources:

- Service part numbers in Data Center Solution Configurator (DCSC): http://dcsc.lenovo.com/#/services
- Lenovo Services Availability Locator https://lenovolocator.com/

For service definitions, region-specific details, and service limitations, refer to the following documents:

- Lenovo Statement of Limited Warranty for Infrastructure Solutions Group (ISG) Servers and System Storage
  - http://pcsupport.lenovo.com/us/en/solutions/ht503310
- Lenovo Data Center Services Agreement http://support.lenovo.com/us/en/solutions/ht116628

### **Services**

Lenovo Services is a dedicated partner to customer success. Lenovo's goal for customers is to reduce capital outlays, mitigate IT risks, and accelerate time to productivity.

Here is a more in-depth look at what Lenovo can do for their customers:

### Asset Recovery Services

Asset Recovery Services (ARS) helps customers recover the maximum value from their end-of-life equipment in a cost-effective and secure way. On top of simplifying the transition from old to new equipment, ARS mitigates environmental and data security risks associated with data center equipment disposal. Lenovo ARS is a cash-back solution for equipment based on its remaining market value, yielding maximum value from aging assets and lowering total cost of ownership for customers. For more information, see the ARS page, http://lenovopress.com/lp1266.

#### Assessment Services

An assessment helps solve customer IT challenges through an onsite, multi-day session with a Lenovo technology expert. Lenovo performs a tools-based assessment which provides a comprehensive and thorough review of a company's environment and technology systems. In addition to the technology-based functional requirements, the consultant also discusses and records the non-functional business requirements, challenges, and constraints. Assessments help organizations, no matter how large or small, get a better return on their IT investment and overcome challenges in the ever-changing technology landscape.

## • Design Services

Professional Services consultants perform infrastructure design and implementation planning to support customer's strategy. The high-level architectures provided by the assessment service are turned into low level designs and wiring diagrams, which are reviewed and approved prior to implementation. The implementation plan will demonstrate an outcome-based proposal to provide business capabilities through infrastructure with a risk-mitigated project plan.

#### Basic Hardware Installation

Lenovo experts can seamlessly manage the physical installation of customer's server, storage, or networking hardware. Working at a time convenient for the customer (business hours or off shift), the technician will unpack and inspect the systems on customer site, install options, mount in a rack cabinet, connect to power and network, check and update firmware to the latest levels, verify operation, and dispose of the packaging, allowing customers to focus on other priorities.

#### • Deployment Services

When investing in new IT infrastructures, customers need to ensure that their business will see quick time to value with little to no disruption. Lenovo deployments are designed by development and engineering teams who know Lenovo products and solutions better than anyone else, and Lenovo technicians own the process from delivery to completion. Lenovo will conduct remote preparation and planning, configure and integrate systems, validate systems, verify and update appliance firmware, train on administrative tasks, and provide post-deployment documentation. Customer's IT teams leverage Lenovo skills to enable IT staff to transform with higher level roles and tasks.

### • Integration, Migration, and Expansion Services

Integration, Migration, and Expansion Services allow to move existing physical and virtual workloads easily, or to determine technical requirements to support increased workloads while maximizing performance. These services include tuning, validation, and documenting ongoing run processes, and they leverage migration assessment planning documents to perform necessary migrations.

Some service options may not be available in every region. For more information about Lenovo service offerings that are available in a specific region, contact a local Lenovo sales representative or business partner.

# Regulatory compliance

The ThinkSystem SR250 server conforms to the following regulations:

- Energy Star 3.0
- FCC Title 47 CFR Part 15 Subpart B
- ICES-003/NMB-03, Class A
- UL62368-1
- NOM-019
- VCCI, Class A
- AS/NZS CISPR 32, Class A
- CCC GB4943.1, GB9254 Class A, GB17625.1, CECP, CELP
- BSMI CNS13438, Class A; CNS14336-1; CNS15663
- KN32, Class A; KN35
- BIS
- TR CU 020/2011; TR CU 004/2011
- IEC60950-1, IEC62368-1 (CB Certificate and CB Test Report)
- CE Mark (EN55032 Class A, EN60950-1, EN55024, EN50581, EN61000-3-2, EN61000-3-3, EN62368-1)
- CISPR 32, Class A
- TUV-GS (EK1-ITB2000, EN62368-1)
- Reduction of Hazardous Substances (ROHS)

### **External drive enclosures**

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the SAS adapters for external storage section.

**Note:** Information provided in this section is for ordering reference purposes only. For the operating system and adapter support details, refer to the interoperability matrix for a particular storage enclosure that can be found on the Lenovo Data Center Support web site: <a href="http://datacentersupport.lenovo.com">http://datacentersupport.lenovo.com</a>

Table 54. External drive enclosures

|  | Part numbe                          | er      |         |  |  |  |
|--|-------------------------------------|---------|---------|--|--|--|
| Description  | Worldwide                           | Japan   | PRC     |  |  |  |

# Uninterruptible power supply units

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo.

Table 61. Uninterruptible power supply units

| Part number | Description  |
|-------------|--|
| 55941AX     | RT1.5kVA 2U Rack or Tower UPS (100-125VAC)   |
| 55941KX     | RT1.5kVA 2U Rack or Tower UPS (200-240VAC)   |
| 55942AX     | RT2.2kVA 2U Rack or Tower UPS (100-125VAC)   |
| 55942KX     | RT2.2kVA 2U Rack or Tower UPS (200-240VAC)   |
| 55943AX     | RT3kVA 2U Rack or Tower UPS (100-125VAC)   |
| 55943KX     | RT3kVA 2U Rack or Tower UPS (200-240VAC)   |
| 55945KX     | RT5kVA 3U Rack or Tower UPS (200-240VAC)   |
| 55946KX     | RT6kVA 3U Rack or Tower UPS (200-240VAC)   |
| 55948KX     | RT8kVA 6U Rack or Tower UPS (200-240VAC)   |
| 55949KX     | RT11kVA 6U Rack or Tower UPS (200-240VAC)  |
| 55948PX     | RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)   |
| 55949PX     | RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)  |
| 55943KT†    | ThinkSystem RT3kVA 2U Standard UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets)    |
| 55943LT†    | ThinkSystem RT3kVA 2U Long Backup UPS (200-230VAC) (2x C13 10A, 2x GB 10A, 1x C19 16A outlets) |
| 55946KT†    | ThinkSystem RT6kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)          |
| 5594XKT†    | ThinkSystem RT10kVA 5U UPS (200-230VAC) (2x C13 10A outlets, 1x Terminal Block output)         |

<sup>†</sup> Only available in China and the Asia Pacific market.

#### **Lenovo Financial Services**

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an indepth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region-specific offers, please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:

https://www.lenovo.com/us/en/landingpage/lenovo-financial-services/
