

It looks like a phone and acts smarter.

## HP iPAQ Voice Messenger

If you insist on a small mobile phone, yet need practical and powerful voice, email, and GPS features<sup>1,2,3</sup>, this sleek 3G world phone is deceptively simple and surprisingly smart.

### Small and simple

First and foremost, you want it to be a phone. You'll appreciate how easy it is to quickly dial a number on the 20-key keypad. Text messaging<sup>2</sup> is easy, too, with intelligent predictive text that learns your words and style from messages and emails. You can instant message<sup>2</sup> from your phone with your network of friends and colleagues with integrated Windows Live Messenger. And when you need to quickly silence your phone, simply push the convenient ringer/sound switch on top of the device. Familiar Windows Mobile 6.1 Standard Edition means you can skip the "new phone" learning curve.

### Smart and practical

You also want more sophisticated features. Get to your email and the Internet in many countries around the world with advanced wireless technology (Tri-Band 3G, HSPA, and Quad-band GSM/GPRS/EDGE)<sup>1</sup>. Where WiFi is available, you can connect to the Internet and email<sup>1</sup> without using your data plan minutes. While on the road, find your way with integrated GPS and Google Maps<sup>3</sup>. Synchronize your extensive contacts, appointments, and tasks from your PC with Microsoft Office Outlook Mobile. Access your important Microsoft Office Mobile files and your favorite photos and music with up to 8GB<sup>4</sup> of convenient micro SD storage. Capture and share pictures with the 3.1MP auto focus camera with 5X digital zoom – even upload your photos to Snapfish<sup>1</sup> directly from your iPAQ Voice

Messenger.

Who knew such a small phone could do so much!

# HP iPAQ Voice Messenger

<b>Operating system</b>	Windows Mobile® 6.1 Standard
<b>Processor</b>	Qualcomm 7201A Processor
