

GS510TLP, GS510TPP, GS418TPP

Smart Managed Switches just got more powerful and flexible

As a leading provider of network equipment for SMBs, NETGEAR® understands the importance of providing great choice of PoE port counts and power budgets that can adapt to the business's needs, whether in the hospitality, catering, education or retail domains.

The GS510TLP 8-Port Gigabit Smart Managed Switch with PoE+ and 2 SFP Ports joins the NETGEAR Standalone Smart Managed Switches family, adding full 8 port PoE+ support for deployment of modern high-power PoE devices. Cautious spender organizations can now deploy denser PoE+ devices connected to a cost-effective switch, with a reasonable PoE power budget of 75W. Fan-less, the GS510TLP supports perfectly silent desktop operation or rack mounting.

Organizations who buy infrastructure for the long term and want future proofing for the unforeseeable can require GS510TPP 8-Port Gigabit Smart Managed Switch with PoE+ and 2 SFP Ports: 190W PoE budget offers more headroom. Temperature- and load-based fan-speed control combines accurate monitoring with minimized system acoustic noise: unlike other high power PoE switches on the market, the GS510TPP supports quiet desktop operation or rack mounting with a maximum of 32dB at full power and 25°C (77°F) ambient.

The GS418TPP Easy Mount 16-Port Gigabit Smart Managed Switch with PoE+ and 2 SFP Ports is future-proof with 240W of PoE budget and ideal for "Virtually Anywhere™" deployments. Slim design (3.94 inches, 10 cm deep) and mounting accessories allow for access point, IP camera or VoIP endpoint placement optimization and cabling efficiency even outside the rack. The GS418TPP supports Easy Mount quiet operation or rack mounting with a maximum of 33dB at full power and 25°C (77°F) ambient

Highlights

The NETGEAR ProSAFE PoE+ Gigabit Smart Managed Switches provides a great value, with configurable L2 network features like VLANs and PoE operation scheduling, allowing SMB customers to deploy PoE-based VoIP phones and IP surveillance. Advanced features such as IPv4/IPv6 Layer 3 static routing, DiffServ QoS, LACP link aggregation and Spanning Tree will satisfy even the most advanced small business networks.

Key features include:

- Layer 3 static routing with 32 routes (IPv4 and IPv6) for interVLAN local routing
- Advanced VLAN support for better network segmentation
- L2/L3/L4 access control lists (ACLs) for granular network access control including 802.1x port authentication
- Advanced per port PoE controls for remote power management of PoE connected devices including operation scheduling (e.g. Wireless APs, IP security cameras, LED lighting, secure access door locks, IoT devices...)
- Advanced QoS (Quality of Service) for traffic prioritization including port-based, 802.1p and L2/L3/L4 DSCP-based
- Auto "denial-of-service" (DoS) prevention

- IGMP Snooping and Querier for multicast optimization
- Rate limiting and priority queuing for better bandwidth allocation
- Port mirroring for network monitoring
- Energy Efficient Ethernet (IEEE 802.3az) for maximum power savings
- Cable test to troubleshoot connection issues
- SNMP v1, v2c, v3 and RMON remote monitoring

Build a future-proof network with NETGEAR:

- Solid performance with 20Gbps (GS510TLP, GS510TPP) and 36Gbps (GS418TPP) non-blocking architecture, 16K MAC addresses, 256 VLANs, 100 shared ACLs and 512 Multicast groups
- Comprehensive IPv6 supporting management, QoS, ACL and routing, ensuring investment protection and a smooth migration to IPv6-based network
- PoE+ support on all models and on all ports, providing flexibility in the future to add more power-hungry devices such as video phone, PTZ camera and 11ac Wireless APs into the network

- 2 Dedicated SFPs, not only providing fiber uplinks, but also uplink redundancy and failover, improving reliability and availability for the network

Smart IT, not Big IT

- Easy-to-use Web browser-based management GUI makes setup and management simple
- Standards-based technology ensures interoperability with any standards-based devices in the existing network
- Dual firmware images improve reliability and uptime to your network
- Worry-free with NETGEAR ProSAFE LIFETIME Hardware Warranty*
- Minimal down-time with NETGEAR ProSAFE LIFETIME Next-Business-Day Replacement Warranty
- Get deployment assistance with 90-days Free 24x7 Advanced Technical Phone Support**
- LIFETIME Online Chat Technical Support

* This product comes with a limited warranty that is valid only if purchased from a NETGEAR authorized reseller, and modifications to product may void the warranty; covers hardware, fans, and internal power supplies - not software or external power supplies; see <http://www.netgear.com/about/warranty/> for details. Lifetime technical support includes basic phone support for 90 days from purchase date and lifetime online chat support when purchased from a NETGEAR authorized reseller.

** The NETGEAR OnCall 24x7 contract provides unlimited phone and email technical support for your networking product. For ProSAFE products purchased prior to 06/2014, also includes next business-day hardware replacement.
