

## AMP18EU | Targus Presentation Remote

Take the stress out of presentations with the Targus presentation remote. Thanks to its 2.4GHz cordless technology, you'll be free to move around and control your Microsoft PowerPoint™ or Apple Keynote™ presentation remotely, without wires and cords getting in the way. The Targus Presentation Remote provides the easiest way to give presentations. The presentation remote couldn't be simpler to use, even if you've never used one before. It fits neatly into the palm of your hand and with just two buttons, there's no danger of pressing the wrong key or getting confused. You'll be free to focus on your actual presentation, rather than the remote. The mini USB receiver stores neatly inside the remote when it's not in use for added convenience, so it won't get lost or damaged. Whether you have a Mac, PC or Netbook, this presentation remote is perfect for stress-free, professional-quality presentations.

Functionality – Two buttons (forward / backward) allow the user to open and operate a presentation with ease
