

New generation RollerMouse Classic2 – now with additional new benefits:

- Keyboard supports for ideal keyboard position
- Easily switch between 500 dpi and 875 dpi
- Improved wrist rests with durable leatherette surface
- Overlay with standard button functions for easy start

RollerMouse Classic2 is an updated version of the original RollerMouse introduced in 2001. With the new RollerMouse Classic2, everything you need is placed centrally in front of you. This allows you to work in a relaxed manner and helps to prevent or eliminate typical pains related to working with a traditional mouse.

Ergonomics

- The central position allows you to keep your arms and hands comfortably in front of you, eliminating the need to reach out for a traditional mouse.
- Pain in the shoulders, elbows, neck and other symptoms of Repetitive Strain Injuries (RSI) are prevented or relieved.
- Can be used with either the left or right hand for variation and greater comfort.
- Easy and accurate fingertip cursor control.
- Unique keyboard supports allows you to adjust your keyboard to the optimal height and angle.
- Less physical strain and improved precision makes work easier and results in higher efficiency.

Features

- Pre-programmed buttons, including “one-touch” double click.
- Unique keyboard supports for optimal angle and height.
- Improved wrist rests in high quality and durable leatherette.
- Standard cursor speed (500 dpi) can easily be adjusted up to 875 dpi for better precision.

Stories

- Over 500,000 RollerMouse users are already enjoying the benefits of increased efficiency and reduced injury.

Easy start

- Simply plug into a USB port on your PC or Mac.
