Quick guide / User Manual

Vertical Mouse Evoluent D

With a standard mouse, the wrist is fully turned, i.e. the palm faces downwards. This is not a natural posture.

When you place your wrist in the 'handshake grip' position, it has assumed a neutral posture. This is easier to maintain and is, at the same time, more pleasant. And the more comfortable you are sitting in front of your computer, the more productive you are.

The Evoluent Mouse is the most advanced vertical mouse in the BakkerElkhuizen product portfolio.

Standard button settings

- 1 Top button left click
- 2 Middle button auto-scroll
- 3 Bottom button right click
- 4 Upper thumb button back
- 5 Bottom thumb button no function without driver

BAKKER ELKHUIZEN

Set speed

Press the button on the side of the mouse to set the speed. Current setting can be read from the indicator lights on the top of the mouse.

Windows Install

Before connecting Evoluent Mouse, go to Control Panel, Add or Remove Programs and remove any previous Evoluent Mouse Manager and any other mouse software, except touchpad driver. If there is no mouse software listed, skip this step.

- Before connecting the Evoluent Mouse, go to Control Panel, Mouse, and:
 - (1.) Uncheck the box for Swap Primary and Secondary Buttons.
 - (2.) Uncheck the box for Enhance Pointer Precision. This is very important.
 - (3.) In Pointer Options, set the pointer speed slider to the middle position.
- Insert the USB connector into a USB port directly on the computer.

Mouse Properties	J Mouse Properties
Buttons Pointers Pointer Options Wheel	Buttons Pointers Pointer Options Wheel
Button configuration Select this check box to make the button on the right the one you use for primary functions such as selecting and dragging:	Motion Select a pointer speed: Slow Fast

 Double click Drag scroll

Driver

- (1) Adjust the speed of the scroll wheel.
- (2) The click lock functions enables you to keep the left mouse button activated. Deactivate with another click.
- 3 The auto click function creates an automatic click after a set time on a clickable area.
