A students best friend

C-Pen, a digital highlighter that is the fastest, easiest way of creating summaries and taking notes from schoolbooks and documents. Instead of using highlighting pens and spending hours retyping the information, highlight with the C-Pen and have the text instantly sent to your computer, tablet or smartphone.

Highlight and listen

C-Pen is an absolute lifesaver for the reading/writing impaired. C-Pen eliminates the time consuming and exhausting task of reading and writing, and allows the user to focus on learning. Scan all the information with C-Pen and listen to it on you computer or mobile device. Simply a smarter way of learning.

Translation in one swipe

With C-Pen you get full sentence translation in a single swipe. If you're a student learning a new language this is an excellent tool to quickly translate words and full sentences. Spend less time typing and more time on learning.

Works with any software

Already have a text-to-speech or translation software that you prefer using? No problem, C-Pen can input text into any software you choose, just place the cursor and highlight with the C-Pen and the information is instantly inserted.

C-Pen Core

C-Pen Core is the main software and includes the Optical Character Recognition (OCR) that turns the scanned printed text into computer editable text. It also features the text to cursor function that automatically inserts the scanned text into the application of your choice, wherever the cursor is positioned

Apart from the core function, users can download Add-On's that integrate with C-Pen Core and give expanded usability:

Translation

Just select which languages you want to translate the text to and from, scan with your C-Pen and you're done. This gives you free, full sentence translation in more than 50 different languages.

Text Replace

The Text Replace Add-On gives you the possibility to get the text edited automatically before it is inputted. You can for example remove unwanted spaces in the scanned text, separate text and digits or create your own rules for how the text should be processed.

Highlighter

Print a document, highlight with C-Pen and this Add-On automatically highlights the exact same information in the digital original for you.

C-Dictionary

Scan any word with your C-Pen into C-Dictionary and the application will instantly look up the word for you. Choose between a wide range of dictionaries from Oxford and Franklin.

Voxit Budgie Pro

Budgie Pro is a easy to use text to speech software that is designed to support individuals who struggle with reading and writing. Scan with your C-Pen and the software reads the text aloud. You can also save the reading to MP3 or WMA files ready for playback.

C-Pad™

C-Pad is a control pad for C-Pen. With C-Pad you can easily enter special characters and commands without releasing the C-Pen from your hand.

C-Pen products are design with focus on ease of use, convenience and reliability. All our products have been designed ergonomically so that users can use them in a natural way, as if they were holding a pen. Regardless of it being used by right-handed or left-handed person, C-Pen scans equally accurate in both directions and is comfortable to use.

C-Pen 3.0
