X-PRESS

PORTABLE PULL UP SCREEN

Self-support Intersect Arms

Lighter and Faster

3 Seconds Record Breaking

- The lightest among similar category, 80" diagonal screen weighs only 7.7kg.
- Single button locking mechanism, easy to set up, only 3 seconds is needed.
- Utilizing self-support intersect arms, avails to stop at any position.

Exclusive Patent Technology
The self-support arms are specially designed to sustain variable pressures at different angles and screen positions. This ensures the screen to extend freely. It is user friendly. With only one finger pressing on the handle base, it can be retracted to close smoothly and safely.

Similar Screen Products of Different Brands
Due to the difference in the design of the self-support arms, when their screen is descending past half way, it might loose the supporting pressure, causing the screen to drop down unexpectedly and thus maximize the possible damage.
