ALL-IN DATA RECOVERY SERVICE

EVERYTHING YOU NEED TO KNOW ABOUT OUR  
**DATA RECOVERY SERVICE**  
3 YEARS COVER & PEACE OF MIND

## DATA RECOVERY - WHAT IS IT?

Data Recovery means rescuing and retrieving files from a broken hard disk drive. Hard disk drives are a key internal component of all computers and laptops, this is where all information and files are stored on. Hard disk drives are also available as external device, mainly used for making a backup of a computer's internal hard drive, or used as additional storage capacity for digital photos, videos or music. Recovering data from a broken hard disk drive is an expert's job, done by qualified technicians in a clean, dust-free laboratory.

## HOW DOES IT WORK?

1. Purchase the Freecom Data Recovery Service package.
2. Register online at [www.freecom.com/datarecovery](http://www.freecom.com/datarecovery). The service is only valid after registration. Data loss that occurred before registering the service is not covered.
3. Should your hard drive crash, contact us online at [www.freecom.com/datarecovery](http://www.freecom.com/datarecovery) or per telephone - we have local Freecom Service Centers throughout Europe.
4. After receiving a confirmation e-mail from us, you can ship the drive to our laboratory - free of charge.
5. Our technicians will send you a diagnostic report per e-mail, including a list of recoverable files.
6. After your confirmation, our laboratory will recover your data and send it back - no additional cost. The recovered data will be returned on a replacement storage media device, depending on the actual amount of recovered data.

## YOUR HARD DISK DRIVE COULD FAIL ONE DAY...

Hard disk drives are mechanical devices, and as such could fail one day. Imagine you have all your family pictures, your home videos, your entire music collection or your work files saved on your computer or an external hard drive and suddenly this drive cannot be accessed. Usually this would simply mean that your data is gone and that the only option for you is to buy a new computer or new hard drive and start all over again, with all your precious memories gone...

## WHY DO I NEED IT?

You may never have experienced a hard disk drive crash. But ask around... anyone who has ever experienced this will tell you that it almost feels as if the world has stopped turning. In a split second all files, information, documents, photos you have created through the years are gone! Most of them are irreplaceable! Now you can limit the chance of indefinitely losing your data. The data on a crashed hard disk drive is often rescuable. Why take the chance? Protect the data on your computer's hard disk drive or your external hard drive. Think of it as an additional warranty or an insurance. It's better to be safe than sorry!

## YOUR DATA MAY STILL BE RESCUED!

When a hard drive stops operating (crashes), the data is very often still present on the drive and might therefore still be retrievable. Recovering data from a hard disk drive is usually a very costly affair, and could set you back at least € 1500 / GBP 1000. Freecom, together with data recovery laboratory LazaRus, have developed a unique product whereby for a small amount of money - less than 1 euro per month - you protect the data on your hard disk drive in case it should crash. By purchasing and registering the Freecom Data Recovery Service you have the right to one data recovery for a period of 3 years after registering. A safe feeling!

## FOR WHICH DEVICES CAN I USE THIS SERVICE?

The Freecom Data Recovery Service can be used in combination with:

- Any computer
- Any laptop
- Any internal hard disk drive
- Any external hard disk drive
- Any multimedia hard disk drive
- Any game console that has a hard disk drive inside
- No matter which brand
- No matter if it's old or new

## FREecom QUALITY

Since 1989 Freecom stands for creating innovative and professional digital (storage) solutions. All Freecom products are designed, engineered and certified in Germany according to the highest quality standards to guarantee customer satisfaction. Our in-house technical development process, the use of the highest quality components and German product inspection standards ensure superior quality and reliability. To meet the high expectations of professional users Freecom products are delivered with extensive warranty and unlimited free helpdesk support.

### Freebyte s.r.l., Rome, Italy:

*"Today we received the recovered data. We thank you for the perfect service supplied, we will suggest it to all our customers. On our side, being the service so effective, we will surely make a consistent new order of your Data Recovery Service."*

### Brenda Heys, Berkshire, UK:

*"Thank you so much for this, I have no back up of any of these files... I cannot believe how stupid I have been not having a back up but there you go. But to get my photographs back will be the world for me!"*

### Patrick Schiess, Neftenbach, Switzerland:

*"World class!!! Very good communication, excellent work... A load was lifted off my mind. I am very pleased and will definitely recommend your service! I have checked the data and all important files are there... Sensational!"*
