

with online sharing

Eye-Fi
Connect | X2

Overview

Eye-Fi Connect X2: the easiest way to save and share memories. Automatically upload photos and videos to your computer and to your favorite sharing site. Choose from 25 websites, including Flickr™, Facebook™, and YouTube™. And that's just the beginning.

- **memory.** Store photos and videos with 4GB of SDHC memory. Perfect for your compact camera!
- **wireless.** Upload photos & videos from your camera through your Wi-Fi network thanks to built-in 802.11n speed.
- **automatic.** Back up and organize photos & videos on your computer in a snap.
- **effortless.** Share on your favorite website, even when your computer is off. Pick from Flickr™, Picasa™, YouTube™ and more.
- **endless.** Can free-up space for you after pictures are safely delivered. Never worry about running out of space again.

Included with Connect X2

1. Endless Memory

Always running out of space? Enable Endless Memory, and your Eye-Fi card will automatically free up space for you once your photos and videos have been safely delivered. It's like having an endless memory card!

2. Online Sharing

With Online Sharing, your Eye-Fi card effortlessly and automatically uploads your memories to one of more than 25 sharing, printing, blogging or social networking websites (or even your own FTP server!).

Available Upgrades

Geotagging

With Eye-Fi's Geotagging service, your photos are automatically tagged to show where they were taken using Wi-Fi Positioning System technology. Never forget where that photo was taken again.

► Geotagging is available for a yearly fee.

Hotspot Access

With Hotspot Access, upload from Wi-Fi hotspots across the US, including Starbucks, McDonald's, hotels, airports and more.

► Hotspot Access is available for a yearly fee.

how it works
