

with geotagging + RAW + ad hoc

Pro | X2

Overview

Eye-Fi Pro X2: the most powerful memory card ever. Class 6 read & write speeds for high performance shooting. The power of 802.11n wireless uploads from your camera to your computer and favorite sharing site. And that's just the beginning.

- **performance.** Store thousands of photos and hours of videos with 8GB of Class 6 SDHC memory.
- **wireless.** Upload photos & videos from your camera through your Wi-Fi network thanks to built-in 802.11n speed.
- **automatic.** Back up and organize photos & videos on your computer without lifting a finger.
- **effortless.** Share on your favorite website, even when your computer is off. Pick from Flickr™, Picasa™, YouTube™ and more.
- **endless.** Wirelessly offload photos & videos so you can keep shooting...it's like having an endless memory card.
- **RAW power.** Get straight to editing with effortless RAW photo uploads.
- **ad hoc flexibility.** Upload photos & videos directly to your laptop—no Wi-Fi router required.
- **geotagging.** Automatically tag photos by location.

Eye-Fi Features

1. Endless Memory

Always running out of space? Enable Endless Memory, and your Eye-Fi card will automatically free up space once your photos and videos have been safely delivered. It's like having an endless memory card!

2. Online Sharing

With Online Sharing, your Eye-Fi card effortlessly and automatically uploads your memories to one of more than 25 sharing, printing, blogging or social networking websites (or even your own FTP server!). Online Sharing is included as a lifetime, unlimited service.

3. Geotagging

With Eye-Fi's Geotagging service, your photos are automatically tagged to show where they were taken. What does that mean? View photos on a map. Search photos by location. You'll never forget where that photo was taken again. Geotagging is included as a lifetime, unlimited service.

4. Ad Hoc Transfers

On-the-go? Don't carry a Wi-Fi router around—your photos and videos fly directly to your laptop with Ad Hoc transfers.

how it works

X2 Engine

Get high performance shooting with Class 6 read and write speeds.

Superpower it with 802.11n wireless performance.
