### **Package Contents**

Ball Joint Mount

Lock Ring

Metal Strap

Gigabit PoE (24V, 0.5A) with Mounting Bracket

Power Cord

## Installation Requirements

- Clear line of sight between GigaBeam AP and station
- Pole-mounting: 7 mm socket wrench or screwdriver
- Wall-mounting: wall fastener (not included)
- Shielded Category 5 (or above) cabling with drain wire should be used for all wired Ethernet connections and should be grounded through the AC ground of the PoE.
  We recommend that you protect your networks from harmful outdoor environments and destructive ESD events with industrial-grade, shielded Ethernet cable from Ubiquiti. For more details, visit ui.com/toughcable
- Surge protection should be used for all outdoor installations. We recommend that you use two Ethernet Surge Protectors, model ETH-SP-G2, one near the device and the other at the entry point to the building. The ETH-SP-G2 will absorb power surges and safely discharge them into the ground.

Note: For guidelines about grounding and lightning protection, follow your local electrical regulatory codes.

# Hardware Overview

remotely via a Reset button located on the bottom of the Gigabit PoE Adapter.

#### 2 PoE IN Port

This Gigabit Ethernet port is used to connect the power and should be connected to the LAN and DHCP server.

#### 3 60 GHz LED

Lights steady blue when 60 GHz link is ready.

#### 4 5 GHz LED

Lights steady blue when the 5 GHz link is ready.

5 LAN LED

The LED will light steady blue when an active Ethernet connection is made to the Ethernet port and flash when there is activity.

G	Power/Status LED	
<b>ч</b>	Fower/Status LED	

Flashing White	Bootup in progress.
White	Ready for use, not connected to Ubiquiti® Network Management System (UNMS™). See <u>"UNMS</u> <u>Management"</u> .
Blue	Ready for use, connected to UNMS.
Steady Blue with Occasional Flashing	Ready for use, unable to connect to UNMS, check connection to UNMS server.
Quickly Flashing Blue	Used to locate a device in UNMS.
Alternating Blue/White	Firmware upgrade in progress.

## Hardware Installation

Go to the appropriate mounting instructions: Pole Mounting or "Wall Mounting".

### **Pole-Mounting**

2.

3.

#### Wall Mounting

The device must be mounted directly to a wood stud or other structurally stable surface to avoid damage to the mounting hole when you adjust the aim.

#### **Optional Accessory**

To enhance stability, you can use the NanoBeam® Wall Mount Kit, model NBE-WMK (sold separately).

Note: Center screw included. Two optional screws (not included) provide additional stability.

#### Installation Instructions

# Aiming

Visually aim the GigaBeam radios at each other.

WARNING: The switch port must comply with the power specifications listed in <u>"Specifications"</u>.

# Configuration

The device is set to DHCP by default, so it will try to automatically obtain an IP address. If that fails, it will use the default fallback IP address, 192.168.1.20. Proceed to the appropriate section, DHCP or <u>"Fallback IP Address"</u>:

#### DHCP

Use one of the following methods:

- Set up the DHCP server to provide a specific IP address to the device based on its MAC address (on the label).
- Let the device obtain an IP address and then check the DHCP server to see which IP address was assigned.
- 1. Connect a computer to your network and configure the Ethernet adapter on your computer with a static IP address on the 192.168.1.x subnet.
- 2. Launch your web browser. In the address field, type: https://192.168.1.20

Then press enter (PC) or return (Mac).

3. Select your Country and Language. You must agree to the Terms of Use to use the product. Click Continue.

## **Safety Notices**

- 1. Read, follow, and keep these instructions.
- 2. Heed all warnings.
- 3. Only use attachments/accessories specified by the manufacturer.

WARNING: Do not use this product in location that can be submerged by water.

WARNING: Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.

## **Electrical Safety Information**

- 1. Compliance is required with respect to voltage, frequency, and current requirements indicated on the manufacturer's label. Connection to a different power source than those specified may result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.
- 2. There are no operator serviceable parts inside this equipment. Service should be provided only by a qualified service technician.
- 3. This equipment is provided with a detachable power cord which has an integral safety ground wire intended for connection to a grounded safety outlet.
  - a. Do not substitute the power cord with one that is not the provided approved type. Never use an adapter plug to connect to a 2-wire outlet as this will defeat the continuity of the grounding wire.
  - b. The equipment requires the use of the ground wire as a part of the safety certification, modification or misuse can provide a shock hazard that can result in serious injury or death.
  - c. Contact a qualified electrician or the manufacturer if there are questions about the installation prior to connecting the equipment.

e. Protective bonding must be installed in accordance with local national wiring rules and regulations.

## **Limited Warranty**

#### ui.com/support/warranty

The limited warranty requires the use of arbitration to resolve disputes on an individual basis, and, where applicable, specify arbitration instead of jury trials or class actions.

## Compliance

## FCC

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions.

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operations of this equipment in a residential area is likely to cause harmful interference at his own expense.

This radio transmitter has been approved by FCC.

### **ISED** Canada

#### CAN ICES-3(A)/NMB-3(A)

This device complies with ISED Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- 1. This device may not cause interference, and
- 2. This device must accept any interference, including interference that may cause undesired operation of the device.

This radio transmitter has been approved by ISED Canada.

The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

#### CAN ICES-3(A)/NMB-3(A)

Le présent appareil est conforme aux CNR d'ISDE Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- 1. l'appareil ne doit pas produire de brouillage;
- 2. l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Le présent émetteur radio a été approuvé par ISDE Canada.

satellites mobiles utilisant les mêmes canaux.

## **IMPORTANT NOTE**

#### **Radiation Exposure Statement**

- This equipment complies with radiation exposure limits set forth for an uncontrolled environment.
- This equipment should be installed and operated with minimum distance 33 cm between the radiator and your body.
- This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

### **AVIS IMPORTANT**

#### Déclaration sur l'exposition aux rayonnements

- Cet équipement est conforme aux limites prévues pour l'exposition aux rayonnements dans un environnement non contrôlé.
- Lors de l'installation et de la mise en fonctionnement de l'équipement, assurez-vous qu'il y ait une distance minimale de 33 cm entre l'élément rayonnant et vous.
- Cet émetteur ne doit être installé à proximité d'aucune autre antenne ni d'aucun autre émetteur, et ne doit être utilisé conjointement à aucun autre de ces appareils.

### Australia and New Zealand

Warning: This equipment is compliant with Class A of CISPR 32. In a residential environment this equipment may cause radio interference.

#### Brazil

Nota: Este equipamento não tem direito à proteção contra interferência prejudicial e não pode causar interferência em sistemas devidamente autorizados.

### **CE Marking**

CE marking on this product represents the product is in compliance with all directives that are applicable to it.

Country List

AT	BE	BG	CY	CZ	DE	DK	EE	EL	ES	FI	FR	HR	HU
IE	IT	LV	LT	LU	MT	NL	PL	PT	RO	SE	SI	SK	UK

BFWA (Broadband Fixed Wireless Access) members noted in blue

Note: This device meets Max. TX power limit per ETSI regulations.

The following apply to products that operate in the 5 GHz frequency range:

Note: This device is restricted to indoor use only when operating in the 5150 - 5350 MHz frequency range within all member states.

Note: All countries listed may operate at 30 dBm. BFWA member states may operate at 36 dBm.

Note: Operation in the 5.8 GHz frequency band is prohibited in BFWA member states. Other countries listed may use the 5.8 GHz frequency band.
