

Laddvagn / Säkerhetsvagn - Fort Knox "Draw" for Laptops, iPads / Tablets

... mobile classroom with an unbeatable combination of security, mobility and versatility.

Partno: 6288K / 6288

CE

Very sturdy construction with the same type of construction and lock that classified safety cabinets are equipped with. Provides a very burglary-proof storage.

Can be ordered with approved Key lock or with an advanced and approved code lock with many adjustment options

Pull-out shelves makes it very easy to insert and take out the Laptop/Tablet

30 Laptops or 30 iPads/Tablets/Mini-Laptops can be stored and charged simultaneously in the cart.

The Laptops/Tablets power adapters are stored inside the lockable gable doors in adapter bags that are hung on the wall or inserted directly into the sockets. Fast and convenient installation.

The power adapter is very easy to take with you if you need charging outside the cart.

Equipped with specially adapted wheels of very high quality which gives an easy to roll, smooth and functional cart

As an option there is an Thermostat-controlled fan (636) if you want the computers in operation, for example, when updating at night (fan is not needed for charging only).

The cart is equipped with a slot for easy locking with the optional "Anchor kit-Wall" (630). Prevents unwanted mobility.

With the optional "Mounting Shelf-Top of the Cart" (632), printers or other equipment can be mounted on the top of the cart.

(Scratch resistant powder coating that can withstand tough conditions).

CEKA-AnchorPad – Leader in theft protection for Computers & Other IT equipment

Charging Cart / Safety Cart - Fort Knox "Draw"

- Charging Cart / Safety Cart - Fort Knox "Draw" from CEKA-AnchorPad is our newly developed and unbeatable solution for simultaneous storage, moving and charging of up to 30 Laptops or 45 iPads/Tablets/Mini-Laptops.
- Mobility enables the cart to function as a mobile classroom or in any context where the moving and charging of Laptops/Tablets needs to be done.
- The cart, which is Sweden's best-selling Charging Cart / Safety Cart, is made of a very solid steel construction with the same locking mechanism as classified safety cabinets. The cart is by far the most powerful and safest on the market.
- Can be ordered in versions with approved keylock of high-security type or with advanced and approved code lock with many settings options that are a good choice if you are many users and eliminate key management. Unique design means that if the battery runs out of the Code-Lock, the battery is easily replaced from the outside of the cart.
- The cart has pull-out shelves, which makes it easy to insert and take out the Laptop/Tablet. Each shelf can be easily removed if your own adaptation of the cart is desired.
- Equipped with specially adapted wheels of very high quality which gives an easy to roll, smooth and functional cart. 2 of the wheels are fixed and 2 are rotatable with brakes to avoid so-called customer-wagon power. A portable threshold plate is included that makes it easy to drive even over high thresholds.
- The cart is CE-Marked for safe use and equipped with outlet strips with 30 earthed socket (220v) for connection of the Laptops / Tablets power adapters. Connection is then made to standard 220v sockets. Upon delivery, a 3-phase adapter is also included if you want to charge the Laptops/ Tablets via a 3-phase socket. Additional socket strip is available as an option if more sockets are needed (635).
- The Laptop/Tablet power adapters are stored inside the gable doors in adapter bags that are hung up in hooks. Fast and convenient installation and very easy to take with you if you need charging outside the cart.
- Smart Charging via App / Wifi. Easy scheduling of charging in groups to minimize load on the electrical system.
- As an option there is an Thermostat-controlled fan (636) if you want the computers in operation, for example, when updating at night (fan is not needed for charging only)

Options available for purchase as needed:

- Anchor Kit Wall (630) – Approved chain to prevent unwanted mobility.
- Mounting shelf - Top of the cart (632)
- 3-Phase adapter (637) if you want to charge Laptops/Tablets via a 3-phase socket.
- Charge/Sync-Unit for 16 iPads/Tablets (6899-16) and Charging Station USB-6-Port (6899-6).
(The cart holds several Charging/Sync units / Charging stations, allowing charging of additional iPads/Tablets if necessary).
