

Norton[™]360 for Gamers

Powerful cyber protection for PC gamers.

Get the experience you want and the protection you need for PC gaming

Norton 360 for Gamers, advanced multi-layered protection for your PC to help protect against cyberthreats like malware, DDoS, doxxing, SWATing, webcam takeovers[‡] and more.

-  **Notification Optimization[‡]** In Norton 360 for Gamers, notifications have been optimized, limiting messages, and giving you more control of what notifications can be permanently silenced. On Windows, Notification Optimization means that we'll only notify you if you're under attack, your protection is at risk, or you aren't using a feature you're entitled to use.
-  **Full-Screen Mode Detection[‡]** Device security for PCs that detects when you're using full-screen mode and silences all but critical security alerts.
-  **Secure VPN** Browse more securely and anonymously by masking your IP address with a no-log VPN to help protect against DDoS attacks, doxxing and help prevent SWATing.
-  **Real-time Threat Protection** Multi-layered, advanced security helps protect against existing and emerging malware threats to your devices, including phishing attacks via chat, text and email and security flaws in games and websites.
-  **50GB PC Cloud Backup^{2+‡}** Automatic, cloud backup for PCs – store your game clips online, freeing up space on your drives.
-  **Parental Control[‡]** Help manage your children's online game activity, so you can spot potential dangers before they become a problem.
-  **SafeCam for PC[‡]** Your webcam lets you keep in close contact with family and friends but can be vulnerable to attack, giving cybercriminals an up-close view into your home, your daily routine, and personal information. SafeCam alerts you to attempts to access your webcam and helps you block those who are not authorized to access it.
-  **Smart Firewall for PC** Monitors communications between your computer and other computers and helps block unauthorized traffic, which is designed to protect your personal files and financial information.
-  **Password Manager** A strong password is important to protect your game accounts. Let us help you store complex passwords, credit card information and other credentials online—more securely.

No one can prevent all cybercrime or identity theft. Not all features available on all platforms.

[‡] Norton Cloud Backup, Notification Optimization and Norton SafeCam features are only available on Windows (excluding Windows 10 in S mode, Windows running on ARM processor). Parental Control features are not supported on Mac and Windows 10 in S mode. 1 To suppress most alerts for Windows, full-screen mode must be in use. 2 Requires your device to have an Internet/data plan and be turned on. To activate backup of video files, you need to configure your backup settings under My Documents to address your individual gaming needs.

Norton 360 Operating Systems Supported:

- Microsoft Windows 10 (some features are not available in Windows 10 S), 8/8.1 (some protection features are not available in Windows 8 Start screen browsers), 7 (with Service Pack 1 or later)
