HP USB Laser Mouse

GW405AA

Introduction

The HP USB Laser Mouse provides the speed and accuracy of laser tracking in a simple, elegant design. It records motion precisely on a variety of surfaces using the latest laser sensing technology from Avago.

The HP USB Laser Mouse has no ball or moving parts, which improves its durability, makes it require less cleaning, and eliminates sticking. The mouse's comfortable, contoured shape fits either hand. It can also work on variety of surfaces. The wheel can be moved slowly in incremental ratchets, or quickly with a single, sweeping motion of the finger to rapidly advance through multiple ratchets. The wheel also functions as a third button when it is activated by pressing it.

Key Benefits

- Improves precision by using laser tracking
 - Provides more durability and easier maintenance by eliminating moving parts
 - Fits either hand
