and lighter than air

World Class Performance

The X360 features state of the art Intel® Centrino® 2 Ultra Low Voltage processor technology, which delivers unrivalled performance, energy efficiency and connectivity too keep you working longer.

Sharper Display

Conventional LCD

Super Bright Gloss LCD

The X360's 13.3" WXGA (1280x800) LED screen is thinner, up to 33% brighter, more durable and uses much less power than traditional LCD screens.

Total Security

For complete peace of mind, the X360 incorporates a secure biometric fingerprint authentication system and a trusted platform module, so your valuable information will always remain safe from prying eyes.

The ultra-lightweight **Samsung X360** sets a completely new standard in mobile computing – offering a comprehensive set of features unlike anything of its kind on the market. Even though it is the lightest notebook in its 13.3" class, weighing a miniscule 1.35 kg, the X360 incorporates all of the extensive communications and data sharing functionality demanded by the new aristocrats of the mobile world – socially interconnected and results-driven professionals.

The X360 also includes a removable 6 cell battery that enables up to 10 hours continuous use – making all day mobile computing a practical reality. Its efficient power consumption is supported by the use of Intel® Centrino® 2 Ultra Low Voltage processor technology and an innovative 13.3" LED screen, which significantly enhances performance compared to a typical LCD, but weighs less, uses much less power and is less prone to damage.

*1.35kg based on Solid State Disk and 6 Cell battery
