RollerMouse Free3 Wireless

Our fastest-ever mouse. The RollerMouse Free3 Wireless combines pinpoint precision and comfort with low profile design. This is the tool for everyone who moves between workstations. Free3 Wireless is built low to the desk, making it ideal for use with slim, compact keyboards. The high cursor speed lets you move the cursor easily and efficiently across large screens – or even multiple monitors. The broad rollerbar makes it simple for you to vary your work posture. Simply put, you can work faster and more comfortably.

Speed without compromise

Improved accuracy and reduced physical strain translate into elevated efficiency. With the RollerMouse Free3 Wireless, you can choose from fully ten cursor speeds, starting at 600 and running all the way up to 2,800 dpi. This means you can move the cursor more quickly and easily over large screens or multiple monitors. In short, you can work faster and more accurately.

Improved workflow, more functions

Free3 Wireless features two new forward and back buttons that function smoothly with most browsers. And to make your workflow even easier, it has a rollerbar with a softer click along with a robust aluminium bottom plate. The tool thus becomes part of the work process, rather than an obstacle to your performance.

Broad rollerbar, more relaxed hand movements

Two hands are better than one. Working with both hands and varying your work posture helps you avoid discomfort and prevent aches and pains. The open, more stable rollerbar gives you fully 35.5 cm of bar to move your hands over – more than in any of our previous products.

- 9 buttons (7 pre-programmed button functions)

- Only 2,3 cm high - still boasts the lowest profile in the RollerMouse family
- The fully open, more stable rollerbar (25 cm) allows for more room to move with 35,5 cm of bar access.
- A wireless USB dongle that can be used for both the Free3 and the Balance Keyboard simultaneously. This eliminates the use of two USB ports.
- Delivers superior precision – up to 2800 dpi
- Ten cursor speeds, ranging from 600-2800 dpi, displayed in both blue (first five speeds) and green (speeds six through ten).
- Ability to check battery power status with one button click, so you'll know when to charge up next.
- Integrated wrist rest of leatherette
- Plug and play USB installation – no driver required
- Two-year warranty
- Measurements (height/length/depth): 2,3 cm/48,9 cm/ 12,1 cm
