- 1.6 GHz processor and two USB 3.0 ports

Simple

- Share data between home devices
- Sets up in <8 clicks
- No license or subscription fees
- Easy photo sharing
- Easy remote access via 128 bit SSL VPN

Overview

In today's connected world, home and office data is more valuable than ever. Smart small office and home users can now put data in one central location without sacrificing price, performance or quality. ReadyNAS Duo v2 and ReadyNAS NV+ v2 can even be used as a private cloud, securely delivering your own music, photos, videos, and documents, anywhere in the world.

Twice as fast as the previous generation, these new 2-bay and 4-bay ReadyNAS models are equipped with a fast processor and the industry's first USB 3.0 ports for blazing file transfer and backup rates. Available diskless or populated, ReadyNAS Duo v2 and ReadyNAS NV+ v2 feature a sturdy steel chassis, hot-swappable drive bays and automatic expansion for painless management and zero downtime.

Home media sharing has never been easier. ReadyNAS Photos II revolutionizes the private photo sharing landscape by allowing users to securely share their photos or albums without resolution restrictions. Granting upload/download access is a breeze and photos can be uploaded from a mobile handheld or even directly from an Eye-Fi™ wireless memory card. In addition, all ReadyNAS units feature the ability to stream content through DLNA® compatible devices like game consoles and televisions or even TiVo®.

With the newly redesigned RAIDiator™ 5 user interface, set up is complete in less than 8 clicks. What's more, common storage tasks such as setting file permissions or creating new user accounts are a breeze. Also, pre-installed on each machine, the ReadyNAS Remote application automatically creates secure connections for easy storage access from phone, tablet and notebooks from wherever life takes you.
