EH-TW6000W

*EH-TW6000 and EH-TW6000W

The EH-TW5900, EH-TW6000 and EH-TW6000W offer cinema enthusiasts, gamers and sports fans a new visual experience, bringing them the power of Full HD 3D in the comfort of their own home. They are some of the most affordable 1080p home projectors in the market.

These projectors deliver a high contrast ratio and are enhanced by Epson's 3LCD technology to provide superb quality images. An equally high White and Colour Light Output of up to 2,200 lumens* means users no longer have to sit in the dark to view their content.

You can easily switch to 3D content that is noticeably brighter than many Full HD 3D home cinema projectors[1] thanks to Epson's unique luminance enhancement technology. The projectors support a wide range of current 3D sources, ensuring there is a large catalogue of films and programmes available to watch.

The projectors have many features designed to make them easy to set-up and operate, such as the manual horizontal slider and vertical keystone correction. The EH-TW5900, EH-TW6000 and EH-TW6000W can project two different images simultaneously via its split screen function; perfect for multiplayer video gaming or watching two sports events at the same time. Powerful embedded 10W speakers provide rich sound and the HDMI connectivity system means Blu-ray players and AV amplifiers can be operated with a single remote control.

The EH-TW6000W is one of the first home projectors with wireless Full HD 3D technology[2]. Users can wirelessly operate their Blu-ray players and laptops to experience their favourite content on a large cinematic scale. If required, users can attach their non-wireless devices to a Wireless transmitter via an HDMI cable to enjoy their chosen content without permanent installation or unsightly cables lying around the home.

KEY FEATURES

- Full HD 1080p big-screen experience with bright 3D technology
- Enjoy exceptional image quality with Epson's 3LCD technology
- Connect and control Blu-ray players, games consoles and set-top boxes with HDMI inputs (3D, CEC)
- 2x10W intergrated speakers
- Watch in daylight with equally high White and Colour Light Output
