

Highlights

- Patented Constant Force technology enables light-touch adjustments
- The revolutionary design allows interaction with your TV by moving the screen to where you want it when watching movies, gaming, exercising and more
- Provides smooth, continuous vertical and horizontal movement of the TV/display in all directions
- Gravity pivot enables tilting capabilities without the need of knobs or levers
- Improves ergonomic viewing for TVs/displays mounted high on the wall
- Constructed from polished aluminum with black trim for maximum strength and bold aesthetics
- Tilt and pan for maximum viewing flexibility
- Cable management clips on the underside of the arm route and hide wires
- Easy to use: simple installation and effortless operation
- Passes Ergotron's 10,000-cycle motion test, which ensures a minimum of five years trouble-free height adjustment

Ergotron®

Interactive Arm

Lift, swing or turn your large TV/display in any direction!

Accommodate the active TV positioning needs of today and tomorrow. Lift, swing or turn your display in any direction! Features up to 20 inches (51 cm) of vertical adjustment and 17.5 inches of (45 cm) motion adjustment to either side.

Now anyone can effortlessly move their TV into multiple positions with only a light touch. Your screen will seemingly float on air, being easily adjusted between standing and seated heights. No more awkward viewing angles and sore necks.

Interactive HD

- ① Patented Constant Force technology enables light-touch adjustments
- ② Cable management clips on the underside of the mount arm route and hide wires
- ③ To fix the tilt position of the display in place, use the lock-down knob on the gravity pivot
- ④ Provides smooth, continuous vertical and horizontal movement of the TV/display in all directions
- ⑤ Extends 24" (61 cm) from wall when in use and can be fully retracted to 5.5" (14 cm) when not in use

Level display at any position with +/- 5° of post-installation rotation
