### High productivity

- Faster printing by utilizing the new PF-06 head and print process
- Faster rendering process of HP-GL/2 by L-COA PRO

### High image quality

- Higher density, clearer lines and text on uncoated paper
- Vivid colour expression suitable for POS / posters
- Water resistant media are supported for outdoor applications

### Main features

- Quieter operation
- High productivity
- High quality printing at low cost even on plain paper
- Fully featured supporting software

### Low TCO

- 130/300 ml ink tanks (available)
- Ink consumption similar to current portfolio (iPF 6xx/7xx)

### Added value

- Silent and compact with a light, robust body suitable for office environments
- Increased security for Corporate and Government environments
- Colour touch panel with movie assistance for ease of use
- Improved PosterArtist software to support poster creation

### Security

Enhanced security as required by large corporations

### Pigment inks

Water resistant inks and media enabling outdoor applications

### Design

Compact design with the smallest footprint

### Noise reduction

60% less noise for improved office convenience and usability

### Ease of use

Operator friendly without the need for training (touch & colour panel)
