

RGBW CONTROLLER 2

Let the light transform your home

FIBARO

House in colours of your needs

RGBW Controller 2 is a plain, inconspicuous cube which allows you to adjust colours in your house the way you want them to be. Whenever you wish to create atmosphere suitable for work, focus or relax, just run the application in your phone or use a voice command, and the light in the room will immediately adjust to your needs. Is there anything better than a sun-filled kitchen on a gloomy, autumn day?

Measurement from external sensors

RGBW Controller 2 in Z-Wave 5 technology

RGBW Controller 2 is a controller characterized by the safety and reliability of the device created on the basis of earlier experience in building versatile controllers. Enjoy versatility and configuration options.

Many images of the same interior

As your moods and needs change, RGBW will make it possible for you to adjust the colours to them. Surround yourself with atmospheric twilight when you and your family start watching a gripping movie. Fill your bathroom with warm yellows and oranges to transform it into a house spa. Let cosmic blue into your children's bathroom to make their every evening another space adventure.

Spectacle of lights within a hand's reach

Nie trzeba wiele, by przestrzeń wokół Ciebie wypełniły nowe kolory. Wystarczy aplikacja w telefonie, a barwy zaczną się zmieniać, jakbyś mieszkał w zaklętym domu.

Nature-inspired atmosphere

Sometimes you may just not feel like adjusting the colours yourself or simply have no time for it. Then RGBW will come in handy and offer a choice of light illuminations which mirror a stormy night, an evening around a campfire or the performance of aurora borealis.

A magic spell is enough

Sit back comfortably and close your eyes to unwind after an eventful day. Say: "Man cave!" And now open your eyes and enjoy rich colours all around you, which will bring the atmosphere of urban jungle and boost your energy. Now, immerse in that world and do the things you love.

Activate „**Man cave!**” scene.

Ideal temperature of light

It is daylight that we feel best and most natural in. Thanks to RGBW Controller 2 you may be able to regulate the temperature of light, thanks to which you will create a brighter and healthier environment for work and studying at home. The duties will not only become more pleasant, but also more fruitful.

Your personal selection of colours

RGBW will also help you become an artist-wizard and create your own light patterns. Just choose the appropriate colours, set them in the right order and play with the saturation and you will have exactly the world you have been dreaming about.

Programme: Relax

Calm at first sight

Of course, you want everyone in your home to be healthy and happy. Fortunately, you can trust your RGBW to take care of the safety of your kids who cannot conjure up perfect conditions to play or develop yet. So when you enter bedroom of you Little Prince and see a green glow, you will know that everything is fine.

Temperature: **22,3°C**

Air quality: **healthy**

Warning colours

RGBW may cooperate with FIBARO system, which protects the safety of your home. Should the security system detect any threat such as fire or burglary, new colours will appear on the walls of your house to warn you and your family.

Burglary alarm!

Well-lit interior

Like a conductor before his orchestra you can control as many as four sources of light in the room.

Thanks to this your light, which you have been using at the kitchen worktop, will patiently follow you to the dinner table, where you sit and dine with your family.

Your house like a masterpiece

Every evening is a beautiful, magical moment, and your little RGBW may even enhance its magic. The lights it controls can make the outside of the house look shine ice blue like a fairy tale castle.

Optimally lit house

RGBW will always let you know how much energy your house has used. It is a valuable tip which allows you to operate your lights so as to minimize energy expenses.

Let the magic happen
